Optical Gel dishes placed strategically on this hotel's roof relocated a well entrenched flock of pigeons.

Dishes can be mounted vertically to protect wood structures against woodpeckers.

Sign letters are an ideal spot for Optical Gel because the dishes can't be seen from below.

Very Discreet

The Optical Gel dishes are only 2-1/2 inches in diameter and 3/8 inch in height. They generally cannot be seen from below.

How it Works

This multi-sensory bird repellent deters birds using sight, smell and touch. Birds see fire or smoke, although there isn't any. They smell peppermint oil, which they hate. The Gel is sticky if the birds do touch it.

Totally Humane

Harmless to birds and humans alike.

Easy to Install

Remove covers from dishes and affix dishes to dry surfaces with silicone or other removable adhesive.

Safe for the Environment

Bird Barrier Optical Gel is made from all organic ingredients.

Longevity

The dishes are effective for 2 - 4 years. The site must be thoroughly cleaned first.

Optical Gel and Cleaning Kit

The key to a successful Optical Gel job is a thorough cleaning and sanitizing, and proper placement of the dishes. This kit includes everything necessary to remove the bird waste, sanitize the area and adhere the dishes to the surface: 24 Optical Gel dishes, adhesive, Dissolve-It, spray bottle, bleach, mask and gloves.
