

Daddi Long Legs™

WHERE TO USE	Rooftops and other open areas, A.C. units, streetlights
TARGET BIRD	Gull, pigeon or larger
BIRD PRESSURE	Light - Medium
MATERIAL	Stainless Steel and Delrin Plastic
INSTALLATION	Delrin base is screwed to surface
INSTALLATION LEVEL	Easy

A sea of Daddi Long Legs protect a roof near the ocean from hundreds of gulls.

Look closely, Daddi Long Legs attached to the top of each light, and the center column.

An eight foot Daddi Long Legs with magnetic base protects this large HVAC unit.

Easy to Install

The Delrin (plastic) base can be screwed into most surfaces and comes with a 1/4" adhesive neoprene gasket. When placed together in groups, overlap the tips 4 - 6 inches.

How it Works

Thin, stainless steel rods rotate in the breeze and wave menacingly, interfering with birds' wings as they attempt to land.

Removable

The center spindle can be easily separated from the base to access the area it is protecting.

Hard to See

The Daddi Long Legs is inconspicuous from short distances and practically invisible from afar. Its unobtrusive design allows for use in even high visibility areas like shopping/walking promenades and parking lots.

Humane

The waving rods have plastic tips to prevent injury to birds or humans.

Daddi Long Legs (ea.)

2 ft. Daddi Long Legs	DD-2000
4 ft. Daddi Long Legs	DD-4000
6 ft. Daddi Long Legs	DD-6000
8 ft. Daddi Long Legs	DD-8000
Boat Base	DD-B105
Sandbag Base	DD-B110
Boat Railing Mount	DD-B115
140 lb. Magnet Base	DD-B140

Mounting Daddi Long Legs

Daddi Long Legs can be glued directly to the surface, a PVC base is no longer necessary. Make sure glue comes up through all the screw holes.

Boat Railing Mount: When birds consider your boat's railing a perfect perch, attach a Daddi Long Legs with our boat railing mount.

Boat Base: This Lexan adapter attaches to the Daddi Long Legs base. It attaches to your boat with a bungee cord or rope.

Sandbag Base: The weighted sandbag base can be used in areas where the standard boat base is not appropriate.

Magnetic Base: Magnets stick best to thicker metal. These magnets have not been wind tunnel tested. Exercise caution when using. Daddi Long Legs should be secured with a safety tether of some sort when magnets are used. Caution, many parking lot lights are actually made from aluminum which is not magnetic. Magnets stick best to flat surfaces, use caution on curved surfaces.
