

**WHERE TO USE**

Ledges, eaves, angle irons, I-Beams and most "L" shaped ledges where total exclusion is the goal.

**TARGET BIRD**

All species, including Swallows

**BIRD PRESSURE**

All pressure levels

**MATERIAL**

UV-stabilized Polycarbonate

**INSTALLATION**

Base is glued to any surface

**INSTALLATION LEVEL**

Easy to Moderate

VIDEO

BirdSlide is mounted to these ledges and painted white to match the aesthetics of this building.

BirdSlide excluded 20+ nesting pigeons from this wide ledge above a roll-up door.

BirdSlide can be cut to accommodate beams and other architectural features.

## When Total Exclusion is a Must

There are ledges where heavy pressure (nesting birds) demands an exclusion system, and netting may be visually unacceptable. BirdSlide completely protects the ledge against all bird species; they simply can't get a grip and "slide" right off the ledge.

## Designed to Disappear

When color matched to the structure, BirdSlide usually looks like it's a part of the building. It comes in gray or beige, but can be primed and painted (by the customer) to match any color.

## Easy to Install

For ledges six inches, the flat base simply glues to any clean surface using Bird Barrier bond. For narrow ledges the "fin" can be trimmed down; for wider ledges an extension can be added. BirdSlide can be screwed to wood.

## Long-Lasting

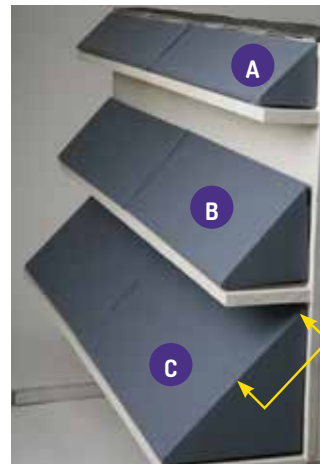

Made from UV-stabilized polycarbonate. Two-year warranty against UV breakdown. Paint the product to extend its life.

## Customizable

BirdSlide can be ordered in lengths up to ten feet (extra freight charges will apply), and it can be painted to match the structure.

Ledges between the beams are an ideal application for BirdSlide.  
\*Inverted application is not recommended for wide eaves.

### (A) Ledges 3" to 6" Wide

Cut the trim area at the appropriate width.

### (B) 6" Ledges

Use BirdSlide exactly as it comes out of the box.

### (C) Ledges Wider than 6"

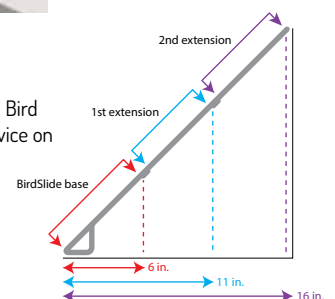

Attach these special extensions for even wider coverage.

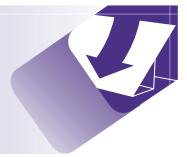

### (D) Eaves

BirdSlide can be installed under eaves to exclude mud swallows. It can easily be cut to accommodate beams and other building features.

If adding a third extension as shown here, please contact a Bird Barrier representative for advice on providing proper support.

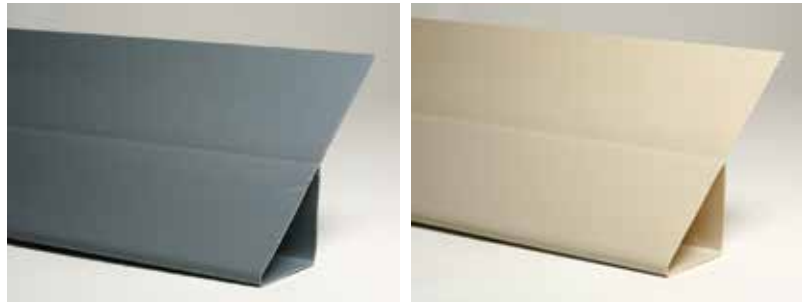

## More Ways to Buy BirdSlide

We are pleased to offer several new cases for your convenience.

- » BirdSlide up to 10-feet long. Custom ordered.
- NOTE: extra freight will be charged for dimensional weight.
- » Custom color runs for large projects.
- » Call for details

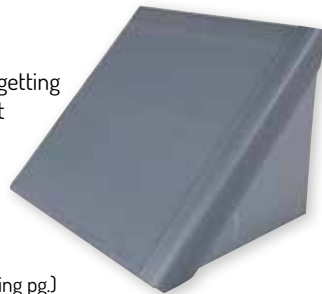

BirdSlide Beige (5 ft.)	SL-5B05

BirdSlide Grey (15 ft.)	SL-5G15
BirdSlide Grey (30 ft.)	SL-5G30
BirdSlide Grey (50 ft.)	SL-5G50

**Now made in 5 ft. lengths for faster installation and greater installation diversity.**

## End Caps

Next Generation. Keep birds and wildlife from getting behind the BirdSlide. Our extruded attachment slides on to the end of the BirdSlide, then the Corner piece slides into that at a 90 degree angle. Glue the cap to the wall and ledge, (sold in a pack of 5 right and 5 left end caps).

Small for standard 6" BirdSlide (B) in photo on facing pg.)

Sm End Cap Beige (5 Pairs)	SL-5B90
Sm End Cap Grey (5 Pairs)	SL-5G90

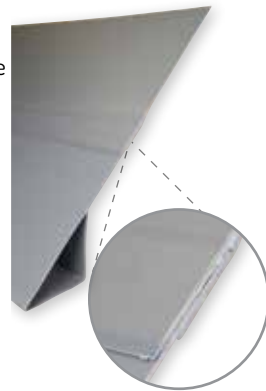

Large for 6" BirdSlide plus one extension (C) in photo on facing pg.)

Lg End Cap Beige (5 Pairs)	SL-5B95
Lg End Cap Grey (5 Pairs)	SL-5G95

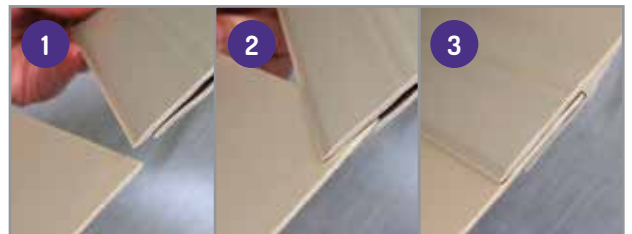

## Slide-on Extensions

For wider ledges (see photo on opposite page), BirdSlide Extensions can be added to increase the size and coverage. Extensions are 6" wide, and now they just slide on to the top of the BirdSlide. This is a fast and easy process which looks attractive and professional.

## BirdSlide Seam Connectors

Gaps can appear between sections of BirdSlide when mounting to uneven surfaces. These new molded connectors lock the ends together and fill in the seam.
