

# Visual Deterrents

## The Intimidator for Woodpeckers

The Intimidator is a professional grade avian deterrent which uses motion and bright flashing to scare away woodpeckers and other birds from unwanted areas. Woodpeckers can cause serious damage to homes and other buildings.

Features:

- Four holographic sides on two separate spinning parts
- All metal components for longevity
- Outdoor grade holographic tape
- Glow-in-the-dark sides for low-light conditions
- Effective with minimal air movement
- Coverage from 10 - 40 ft.

## Placement

Attach the Intimidator above the damage areas (typically along siding and trim boards). While on the ladder or roof and prior to installation, slowly rotate the product in the sunlight, noting the light refraction. It should reflect on or near the damaged areas. In some cases custom posts may be necessary.

- Breeze must cause erratic movement of the light beams
- Multiple Intimidators are necessary for larger infestations

For challenging applications consider using with Optical Gel for a powerful 1-2 punch. See page 24.

## Holographic Owl

University tested with positive results for bird control. The bright flash of the unique holographic /iridescent feather pattern, large eyes and movement deters the most persistent bird from destroying personal property. Simply hang the bird scare Guardian Owl in the problem areas. Made of durable plastic to withstand the outdoor elements. Each Guardian Owl measures 16" tall and 8" wide. It's great for repelling birds from orchards, crops, gardens, boats, docks, barns and homes.

## Screech Owl

Non-moving plastic owls are ineffective, that's why we developed this rotating, screeching owl. Four predator/scare sounds are programmed: birds in distress, predator attack cries and wing beats. The rotating base mounts easily to any flat surface, and spins in the wind. A photo cell activates the sounds during daylight hours only. One per package.

## Scare-Eye Balloon

The bright colors, large eyes and hanging reflective streamers on this 2' balloon are threatening to birds; they think they're being watched by a predator. One/pkg.

Scare-Eye Black SD-SE20

## Octopus

Scare eyes combined with long mylar streamers flash brilliantly in sunlight, signal danger to birds causing them to leave the immediate area. One per package.
