ALMOST INVISIBLE
When seen from a distance of twenty feet or more Bird-Coil virtually disappears, and from fifty feet it's invisible.
HOW IT WORKS
Based on the simple premise that birds like a solid landing platform, Bird-Coil de-stabilizes the ledge, causing unwanted pigeons and gulls to take their mess elsewhere.

HOW TO INSTALL
Bird-Coil can be attached to any substrate using adhesive and our special coil clips. Install one clip per foot with Bird Barrier Bond or the appropriate screw and clip it in place. It's fast, easy and very secure.

TOTALLY HUMANE
Bird-Coil's smooth curves are completely harmless to both birds and unsuspecting workers needing access to ledges.
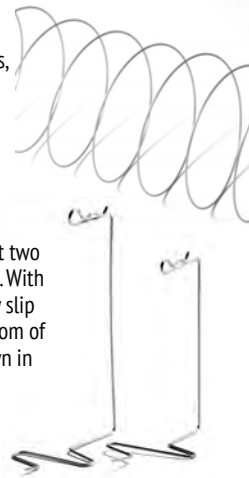

Bird-Coil
Ideal for rooftop perimeters and building ledges, the four-inch stainless steel Bird Coil expands to 25' length. Installation hardware sold separately.

Coil End Posts
The base of the bracket is configured to accept two screws or it can also be glued to the substrate. With the bracket screwed (or glued) in place, simply slip Bird Coil into the upper clip, then slip the bottom of Bird Coil under the end of the bracket as shown in the photograph to secure.
