

BIRD SHOCK

FLEX TRACK

ALMOST INVISIBLE

At only one-quarter of an inch high, and available in five different colors, Flex-Track is hard to see close-up, and invisible from a distance. It is not seen looking up from below.

HUMANE

The intermittent shock is memorable, but does not hurt the birds; it simply teaches them to stay away, long-term.

PATENTED

Bird-Shock Flex-Track is so good, and unique, it has been granted several patents by the US Patent and Trademark Office.

LONG-LASTING

Made from UV-stabilized PVC, and Stainless Steel, Flex-Track will be in service far longer than its five-year warranty.

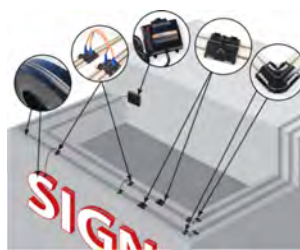

FLEXIBLE AND ADAPTABLE

This low-profile electrified track conforms to any architectural configuration. Flex-Track curves up and down, and side to side; and the stainless steel braid gently follows the UV-stabilized PVC base without wrinkling.

ACTIVE BIRD CONTROL

Bird-Shock Flex-Track has changed the face of the bird control industry. One product is able to protect a wide

variety of surfaces from all bird species, while at the same time being virtually invisible, and incredibly durable. 1. Flex-Track protects straight ledges, and curves easily to protect sign letters. 2. Jumpers snap quickly to the track, making it easy to power multiple tracks. 3. A charger unit mounts to the building and sends intermittent power down the two conductors. 4. Quick connectors are used every 50 feet, or wherever else connections are needed. 5. Corner Quick Connectors make 90 degree angles a snap. Important Note: Electrified systems are active systems. They require regular maintenance.

WHERE TO USE • Any surface where total exclusion is the goal, and low visibility is key; parapets, roof peaks, beams, ledges.

TARGET BIRD • All species

BIRD PRESSURE • All pressure levels

MATERIAL • Ultraviolet-stabilized PVC and Stainless Steel

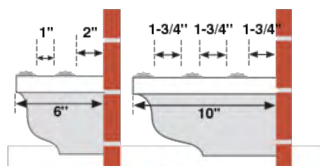

INSTALLATION • Track glues to surface, electrical connectors allow current to flow from one track to the next.

INSTALLATION LEVEL • Somewhat involved

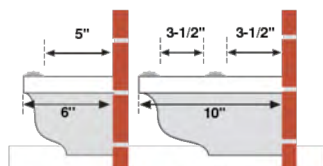

RECOMMENDED SPACING

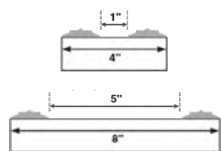

One row of Flex-Track can protect the same width ledge as multiple rows of other products. Labor and material are therefore much less. Often just one row on the outer edge is enough.

Small birds and/or heavy pressure

Large birds and/or light-medium pressure

Double-sided ledges

Anti-water damming pads stuck every 12 inches will allow water to flow under the track.

10 pads are included with each roll of track.

BIRD SHOCK®

Quick Connectors

STRAIGHT QUICK CONNECTORS

Fast and easy to install, attractive and ultra durable. Saves labor time and provides for a long-lasting installation. Use two Straight Connectors to jump power from track to track.

(20 Pack) • BS-Q06

CORNER QUICK CONNECTORS

This connector is revolutionary. It is low profile and features copper conductors over the entire surface. Straight cut the track, lay it inside the connector and snap the durable top down for an attractive connection.

(10 Pack) • BS-Q07

"T" QUICK CONNECTORS

Many jobs require time consuming T's. Now those can be done just as quickly as straight and corner connections. By cutting the small top fins the part also hinges up and down.

(5 Pack) • BS-Q08

Some complicated projects need more connections. These kits are available in addition to the standard set that comes with the flex-track.

CONNECTOR CRIMP TOOL

Solid connections are a must for a long-lasting application. This tool delivers the perfect crimp.

TO-Q20

DELUXE WIRE STRIPPING TOOL

This elegant tool easily strips wires, completely. It grabs, cuts and pulls the wire, you just squeeze. Use the #10 or #8 opening.

TO-Q15

WARNING SIGNS

Bold, plastic warning labels should be placed prominently. Glue or screw to the ledge or side of the building. 10/pack.

10 Units · BS-WL10

LEAD WIRE GUIDES - 100

New, smaller and black for a less visible, tighter job.

100 Units · BS-LW45

BIRD BARRIER BOND

Bird Barrier Bond or 6100 should be used to secure Bird-Shock Flex-Track to clean surfaces. A 10.2 oz. tube secures 30 - 35 ft. of track.

FLEX TRACK LEAD-OUT WIRE

Twisted copper, 14 gauge double wire is easy to cut, strip & crimp.

POWER ACCESSORIES

DIGITAL VOLTAGE TESTER
Make sure your system is sending the correct amount of electricity. Tester reads in 1,000-volt increments.

POWER INDICATOR

Attach these to the track and the building. Flashing indicates the system is functioning properly. Can be seen from distance at night.

BS-TE15

BATTERY TRICKLE CHARGER

Charge Solar Charger batteries quickly or during extended periods of cloudy weather.

BS-TE30

STANDARD & LARGE CHARGERS

SMALL 120V PLUG-IN CHARGER

Weatherproof, can be mounted outside (but make sure the plug itself is in a weatherproof housing).

Input: 120 VAC
Output (max): 9kV +/- 10%
Output Pulse Width at 500 Ohms: 100 uS

Small 120V Plug-In Charger · BS-CP30

Powers
500 ft.

SMALL 12V SOLAR CHARGER

Ideal for smaller projects. Features connectors on the bottom and an on/off switch.

Input: 12V DC
Output (max): 8.6kV +/- 10%
Output Pulse Width at 500 Ohms: 25uS
Output at 500 Ohms: 4.0kV, 0.14J

ATTACH BATTERY LEADS AND

Small 12V Solar Charger · BS-CS30
Replacement Battery · BS-CS25

Powers
500 ft.

110V SMALL CHARGER

UL Approved, this intermittent charger powers up to 1,000 feet of Bird-Shock. Mount indoors in dry space. Flashing light indicates functionality of the system.

Input: 110-120 VAC, 60 Hz, 1VA
Output: 6,350 V (Unloaded), 730 V @ 500 ohm Load
Output Joules: 0.1

Small 110V Charger · BS-CP00

SMALL 4V SOLAR CHARGER

Input: 4V DC
Output (max): 8kV (+/-) 20%
Output Pulse Width at 500 Ohms: 50uS
Output at 100 Ohms: 3.5A

Small 4V Solar Charger · BS-CS00
Replacement Battery · BS-CS05

Powers

Powers
300 ft.

Powers
500 ft.

6V/12V BATTERY CHARGER

Ideal for small jobs that cannot be plugged into mains, or are in the shade (where solar will not charge). This charger functions with a 6 or 12 volt rechargeable battery (sold separately). The battery must be secured to the tree or structure. A flashing light confirms the charger is functioning properly.

Output: 7.3 Kv

6V Battery · BS-CS17
12v Battery · BS-CS18

LARGE BIRDS / LARGE JOBS

These powerful chargers are capable of handling large runs of Flex-Track. They require specific installation methods and the use of a digital track tester. **NOTE:** Installation of these units without regard to the installation instructions can result in visible and audible arcing or sparking. Please use appropriate care and call our specialists for job-specific recommendations.

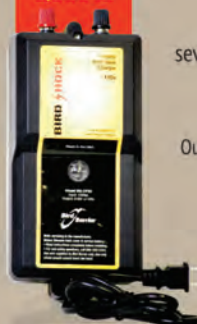

LARGE 120V PLUG-IN CHARGER

This charger is weatherproof, but must be plugged into a weatherproof receptacle. It features a blinking indicator light when operating. Powerful enough for most jobs.

Input: 120 Vac
Output (max): 8.8kV +/- 10%
Output at 500 Ohms: 5.6kV, 1.3J

Large 120V Plug-In Charger · BS-CP25

Powers
2,500 ft.

LARGE 12V SOLAR CHARGER

This solar powerhouse delivers plenty of shock and can be installed anywhere that gets several hours of sunlight every day.

Input: 12Vdc
Output (max): 8.6kV (+/-) 10%
Output Pulse Width at 500Ohms: 25uS
Output at 500 Ohms: 5.4kV, 0.33J

Large 12V Solar Charger · BS-CP25
Replacement Battery · BS-CS25

Powers
1,000 ft.
