

Use either the **magnets** or **hooks** to attach the poles to the ceiling.

**INDOOR**

## MIST NETS

A Soft Net Gently  
Brings Them Down

GUIDE THE BIRD BACK INTO THE NET WITH LASER

# Mist

While holding one pole each, two people can catch a bird as seen below.

**BACK INTO STORAGE** - While holding the net vertically & without sag, compress the poles bringing the net to eye level. Then roll one pole toward the other until met. Unscrew hanging devices & get two trash bags, one with a hole at the bottom and cover the net like a sleeve so it doesn't get hung up on other items.

### Mist Net

Bird Barrier's Mist Nets are ultra fine black twine made into a 3/4" mesh that is nearly invisible to birds. They feature three horizontal pouches and tension lines for the ideal set.

7' x 20' (ea) - N8-MN10

30' (ea) - N8-MN15

40' (ea) - N8-MN20

Attach to ceilings up to 36' in height without ladders or lifts.

INDOOR

## MIST NETS

A Single-Person  
System

# Nets

WAVE TAPE FLAGS TO GUIDE THE BIRD INTO THE NET

Yet, when suspended from the ceiling as seen above, zero people can catch a bird.
