OVO CONTROL® P

Stop Large-Scale Flocks

HERE

OVO

OvoControl P is a ready-to-use bait that controls the reproduction of treated birds, causing the population to decline. This effective and humane technology is especially useful for managing pigeon flocks in larger areas without having to resort to poisons and their associated risks.

OvoControl®

BIRTH CONTROL FOR PIGEONS

WHERE TO USE

Large sites such as refineries, power plants, paper mills, airports, malls, food processing plants, parks, campuses

TARGET BIRD

Pigeons, grackles, starlings, blackbirds, cowbirds and myna birds

BIRD PRESSURE

All pressure levels

MATERIALS

General use pesticide, automated feeder

INSTALLATION

Install automatic feeder on flat rooftops

INSTALLATION LEVEL

Easy

OVO CONTROL FEEDER CIRCULARLY LAUNCHING BAIT

OVOCONTROL P IS A READY-TO-USE BAIT that controls the reproduction of treated birds, causing the population to decline. This effective and humane technology is especially useful for managing pigeon flocks in larger areas without having to resort to poisons and their associated risks.

DOSAGE

OvoControl P is supplied in 30 lb. bags. Apply once daily with an automatic feeder at a rate of 1 lb. per 80 pigeons.

Campuses, Malls, Airports, Parks

Paper Mills, Food Processing

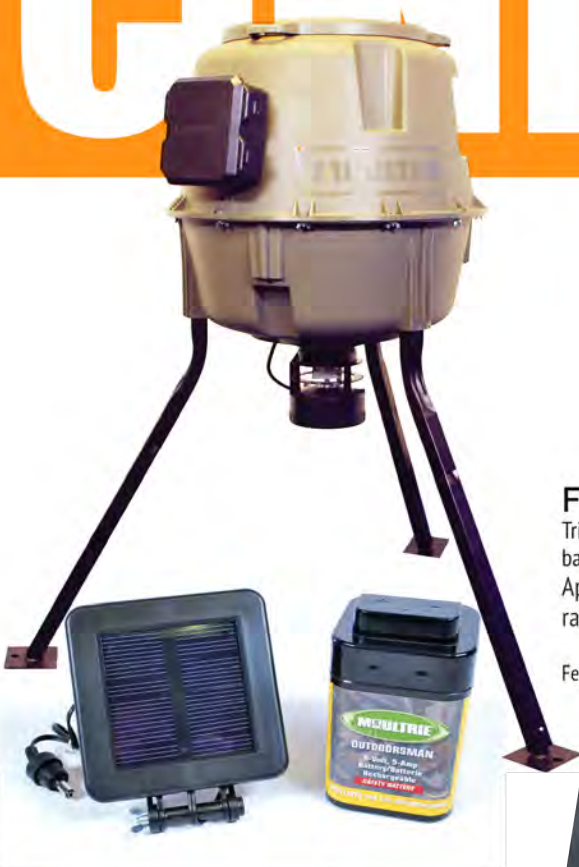

Hospitals, Office Complexes

Refineries, Plants, Waste

IF PIGEONS ARE HERE, HERE, HERE AND EVERYWHERE, THEN PUT AN END TO THIS LARGE-SCALE ISSUE

CONTROL P

BY STOPPING SUCCESSFUL BREEDING
BIRTH CONTROL FOR PIGEONS

FEEDER

Tripod Feeder includes battery and solar panel. Apply bait once daily at a rate of 1 lb. per 80 birds.

Feeder - OV-PG12

Feeder Mat

Heavy Duty 3/8" rubber mat protects sensitive roofs and secures the feeder to a flat surface. Features pre-punched bolt holes that match up to the feeder's feet for a bolted connection. Secure with bricks or other appropriate weights.

Feeder Mat OV-PG25

REGISTERED BY EPA (REG. #80224-1)

Approved in all states as a general use pesticide, OvoControl P is ideal for large areas where some pigeons can be tolerated but where a substantially reduced population is desired. OvoControl P is non-hazardous and supported by the Humane Society of the United States, ASPCA, Audubon and the Peregrine Fund.

RECOMMENDED USE

Baiting can begin at any time – flat rooftops are ideal. OvoControl P has a wide margin of safety and efficacy. No special license is required to purchase or apply the product.

EFFICACY

Pigeons breed rapidly – just five mating pairs can produce up to 400 pigeons in only two years. Fortunately, the life-span of urban pigeons is short, limited to just 2-3 years. When applied according to label directions, OvoControl P interferes with egg hatch-ability. Since no new birds are hatching, the population of birds declines naturally and continuously. Field studies show a reduction of approximately 50% annually. Recently collected data at a monitored site in San Diego reflected an 88% decline over 28 months.

NON-TARGETS

OvoControl P has a contraceptive effect only in birds and has no secondary effects in birds of prey. OvoControl P is considered a pesticide and care should be taken to avoid administration to non-target birds and other animals.
