

Protect an entire roof system of any size & of any technology.

THE BENEFITS OF STEALTHNET

- Effective against **all** bird species
- Highly resistant to ultraviolet rays
- Flame-resistant (flame-proof see pg. 26)
- Available in two colors
- Available in 7 standard & **custom sizes**
- Nearly invisible in most situations
- Low-profile installation system
- Twine is twisted and knotted
- Will not rot or absorb water
- Protecting structures worldwide
- Specified on historical properties

WARRANTY

Black StealthNet: **10 years** • Stone StealthNet: **3 years**
Extended warranties for **indoor applications** are available. See page 17 for more details.

MATERIAL

StealthNet is available in black, stone (beige). The netting is composed of very thin, ultra-strong, knotted strands of **polyethylene twine. Six strands, total, each 12/1000 in.** (hence the name 12/6), are wrapped **rope-like** into one strong, **rot-resistant, U.V. protected** twine. With a **breaking strength of 52 lbs. per twisted strand**, StealthNet is the strongest polyethylene netting available in the world. StealthNet's **U.V. treatment and color pigmentation are embedded** in the composition (not just dipped), making the net more resistant to the effects of the sun with a more consistent coloring throughout.

LONG-LASTING

StealthNet is **manufactured using the most advanced technology in the world**, and has been developed to withstand a wide range of environmental conditions. Polyethylene is the most ultra-violet resistant netting material available and StealthNet has extra ultraviolet stabilizers added in its raw materials, creating a durable, long-lasting net.

INSTALLATION

StealthNet can be installed using a **variety of fasteners created specifically for your building's needs**. Whether it's masonry, steel or wood, we offer a discrete suspension system for a maintenance-free permanent installation.

TOTALLY HUMANE

StealthNet provides a harmless, **impenetrable barrier** against all pest birds.

NOT ACUTAL SIZE

Pigeons and larger birds

INSTALLATION OF NETS

StealthNet is attached to a 1/64-inch (2mm) perimeter cable which is supported by a wide variety of intermediate and corner attachments designed for masonry, wood or steel. The cable is tensioned using turnbuckles and the netting is attached to the cable using net rings.

WHERE TO USE

Any enclosed or semi-enclosed area, opening or configuration where pest birds are to be excluded, including open beam structures, loading docks, buildings facades, courtyards, etc.

Other Net Models

NO-FLAME STEALTHNET
AT EYE-LEVEL

NO-FLAME STEALTHNET
NOT-SEEN FROM BELOW

NO-FLAME STEALTHNET

Bird Barrier's No-Flame StealthNet conforms to NFPA 701, which states that the net is self extinguishing (it will put itself out after being exposed to an open flame). This net is ideal for interior applications like airplane hangars, sports facilities and other sensitive areas. It is also ideal for netting jobs around residential settings, like condos and apartment buildings. The No-Flame StealthNet is distinguished by a blue strand twisted in with the black strands.

3/4" Black Flame-Proof 25' x 25' - N1F-B110
3/4" Black Flame-Proof 50' x 50' - N1F-B220
3/4" Black Flame-Proof 50' x 100' - N1F-B240

BAT NET

Special knotted netting just for bats. Our 3/8" polyethylene knotted mesh is ideal for all bat species, and is far stronger than other nets available. The black mono-filament withstands ultraviolet radiation extremely well, and is very hard to see when installed in shadowed areas. Another great feature is the large sizes available so any bat exclusion is possible with a single sheet, eliminating the need for seams.

StealthNet for Bats 10' x 10' N8-B100
StealthNet for Bats 10' x 25' N8-B105
StealthNet for Bats 25' x 25' N8-B110

STAINLESS STEEL WIRE CLOTH

This high quality stainless steel hardware cloth is meant for difficult bat exclusion projects. The mesh is on 1/2" centers and offers an effective long lasting exclusion screen where other products might fail. Four feet wide, this mesh is available custom cut in 1 foot increments (min. order 4 sq. ft.) and is cut to your order. Lengths up to 100' long are available in a single piece. Please obtain delivery quotes for large orders.

Black PVC-coated, 19-gauge, 1/2" & 1" wire mesh offers an effective long lasting exclusion screen where other products might fail. Available in three widths (6", 8", 12") & custom cut (1/2" only) per square foot (4' wide & 1' increments). It can be bent into custom shapes & glued or screwed in place.

Hand Ringer Net Ring Tool - TH-1000

The standard tool for attaching netting to cable, P7 Hand Ringer accepts a cartridge of 50 net rings for fast and easy use. Great for small jobs. Light (0.5 lbs.), affordable (relative to the other tools), very maneuverable & easy to re-load.

Trigger Ringer Net Ring Tool + 100 9/16" Net Rings - TH-1500

This GL Trigger Ringer uses a 9/16" net ring and has a brake-like trigger that helps eliminate hand, wrist and forearm fatigue when the job requires a lot of net rings.

Bostitch AIRPRO Ringer Net Ring Tool + 100 1/2" Net Rings - TH-200-0

This fast operating tool is a must on large netting projects saving you time and money. A compressor powers the gun with a clip of 1/2" 100 rings & requires a 95 PSI. It's a very reliable tool with a thin extended nose that gets into tight spaces quickly. It weighs in at 2.8 pounds holding a 100 rings max.

Net rings hold the netting to the cable by forming metal loops that connect netting together or to cable. They are applied using one of three tools. Each tool has distinct features; most professionals have at least two of the following tools in their tool box.

BOSTITCH AIRPRO RINGER 1/2" & 3/4" NET RINGS

- 1/2" Galvanized Rings (10,000) - TH-G200
- 1/2" S.S. Rings (10,000) - TH-S200
- 3/4" Galvanized Rings (10,000) - TH-G300
- 3/4" S.S. Rings (10,000) - TH-S300

TRIGGER RINGER 9/16" NET RINGS

- Galv. Net Rings (2,500) - TH-G150
- S.S. Net Rings (2,500) - TH-S150

P7 HAND RINGER NET RINGS

- Black rings are available for the P7 Hand ringer.
- Nearly eliminates the visibility of rings on all black netting projects
- Make seams & repairs invisible
- Almost invisible perimeter cable

- Black Net Rings (2,500) - TH-B100
- Galv. Net Rings (2,500) - TH-G100
- S.S. Net Rings (2,500) - TH-S100

Net Rings to zipper makes an access point.

Net Rings joining two nets (top rings)

Net Rings most fundamental task: attach net to cable.

SELECTING THE RIGHT TURNBUCKLE

The cable must be tensioned properly to insure a secure installation. Use small turnbuckle for cable runs under 25'; Medium turnbuckle for runs 25 to 75' & large turnbuckle for runs over 75 ft.

GALVANIZED TURNBUCKLES

Use galvanized for dry, salt-free climates with galvanized net rings and net cable. 10 per pack.
Sm. Turnbuckle Galv. (10) NT-G100
Med. Turnbuckle Galv. (10) NT-G200
Lg. Turnbuckle Galv. (10) NT-G300

STAINLESS STEEL TURNBUCKLES

Stainless steel is best for wet or salty climates. Use with stainless steel cable and net rings. 10 per pack.
Sm. Turnbuckle S.S. (10) NT-S100 Med.
Turnbuckle S.S. (10) NT-S200 Lg.
Turnbuckle S.S. (10) NT-S300

CABLE CUTTER

The sharpest, longest-lasting & easiest tool to use for cutting heavy-duty cable. The overlapping heads give a clean cut up to 5/32" (4mm) as a true cut seen above. The tool features a spring loaded rubber grip handle & a security locking latch.

Cable Cutter (ea.) TO-CC10

RATCHET CRIMPER

Each cable-end must have a strong loop to secure to a turnbuckle or cable-end fastener. The powerful ratchet crimper and ferrules offer the strongest, most discreet system. Use 2 ferrules at each loop for long-lasting hold.

Ratchet Crimper (ea.) TN-R100

NET CABLE

Our 5/64" (2mm) diameter 7x7 construction cable is the standard for perimeter support. It is available in galvanized or stainless steel. Stainless steel is recommended for installations near heavy moisture, chemical environs or salt-laden air.

Galvanized (250 ft) NC-G250
Galvanized (500 ft) NC-G500
Stainless Steel (250 ft) NC-S250
Stainless Steel (500 ft) NC-S500

HEAVY-DUTY EYE BOLT

When adding extra tension to heavier cable it's important to use a corner anchor that will not bend or break.

Heavy Duty Eye Bolt (10) NB-EB30

FERRULES

These high-quality ferrules are designed for

5/64" (2mm) cable. Aluminum for galvanized cable & copper for stainless steel. Two ferrules should be used per cable loop attachment. A special ratchet crimp tool is necessary. 100 per pack.

Copper Ferrules 2.5mm NC-N100
Aluminum Ferrules 2.5mm NC-N200

Use two ferrules at every end or loop for added security.

HEAVY-DUTY CRIMPER

Use this tool with heavy duty ferrules.
Crimp Tool TN-R300

HEAVY-DUTY NET CABLE

This 5/32-inch cable should be used where extra strength is desired such as where StealthNet is not supported for runs of 100 feet or more.

Galvanized (500 ft.) NC-G532
Stainless Steel (500 ft.) NC-S532

HEAVY-DUTY FERRULES

These ferrules are to be used with the heavy duty net cable. Use two per end/loop end and crimp twice per Ferrule. 100 per pack.
5/32-inch Ferrules NC-N500

THE IMPORTANCE OF CORNER ATTACHMENTS

The most important part of a netting job is the corners (where the cables end or turn corners) due to the tension applied by the turnbuckles and the weight of the net. Strong cable-ends and corners are achieved using the correct selection from a wide variety of anchoring systems enabling you to secure the system to any substrate.

MULTI-PURPOSE CABLE BRACKETS FOR STONE STEEL AND WOOD

These versatile stainless steel brackets can be used as a corner or intermediate attachment, and installed as a permanent fixture or as a quick-release cable holder. 100 per pack.

With Hilti Pin NI-CB15
Bracket w/13/64" Hole NI-CB10
Bracket w/1/4" Hole NI-CB25

HILTI .27 Shot 10-pack TO-H250

Long-term StealthNet® bird netting has spanned many an entire bridge.

STEALTHNET®

Intermediate Attachments

THE IMPORTANCE OF INTERMEDIATE ATTACHMENTS

Intermediate attachments hold cable against the wall between corner attachments.

We recommend:

2" netting = 1 every 2'-3'

1-1/8" netting = 1 every 2'

3/4" netting = 1 every 1.5'

MULTI-PURPOSE CABLE BRACKET

This versatile stainless steel bracket can be used as a corner or intermediate attachment, and installed as a permanent fixture or as a quick-release cable holder.

With Hilti Pin - NI-CB15
Bracket w/ 13/64" Hole - NI-CB10
Bracket w/ 1/4" Hole - NI-CB25

ANCHOR RIVETS & SPLIT PINS

One of the strongest and most discreet intermediate attachment systems available for stone, masonry or brick. Insert the Anchor Rivet into a pre-drilled hole and hammer the Stainless Steel Split Pin.

Thread the cable through the hole in the Split Pin. Different lengths are available depending on the substrate integrity & use.

Anchor Rivet 1" (100) - NI-AR10
Split Pin 1" (100) - NI-SP10
Anchor Rivet 1.5" (100) - NI-AR15
Split Pin 1.5" (100) - NI-SP15
6.5mm Drill Bit - TB-S065

NET SPIKE

This hammer-in attachment is the strongest attachment available for stone, concrete or solid brick. Does not require a plastic anchor sleeve, the bent shaft holds it securely in place. Zinc or Stainless Steel coated.

Net Spike Galv. 1 3/4" (100) - NI-SP00
Net Spike SS 1 3/4" (100) - NI-SP05
4.8mm Drill Bit (for both) - TB-S048

NET LOOP

Low profile, stainless steel intermediate attachment for wood or sheet metal. Secure with self tapping screw.

Net Loop (100) - NI-WC20

LAG SCREW

Screw directly into wood, or use with an anchor for masonry.

Stainless, Sm. (100) - NI-NS10
Anchor, Sm. (100) - NI-NS12
Galvanized Lg. (100) - NI-NS25

LAG SCREW DRIVER

Drive our Lag screws into wood and plastic anchors with this tool that fits into the chuck of your hand drill. Lag Screw Driver (ea.) - TB-SP10

Stainless Steel

1/8" - 1/4" (100) - NI-GCS20
5/16" - 1/2" (100) - NI-GCS30
9/16" - 3/4" (100) - NI-GCS40

HILTI LOOP - OPEN AND CLOSED

Constructed of high quality, zinc-plated steel, the Hilti Loop is an easy-to-use attachment for stone, concrete and brick. Drill a hole and hammer it home. Open option for removable nets.

Hilti Closed Loop (100) - NI-H100
Hilti Open Loop (100) - NI-H200
8mm Drill Bit (for both) - TB-S080

KWIK TOG & EYE LOOP (FOR STUCCO)

Stucco is one of the most challenging substrates for bird control. This durable plastic attachment affords a solid base for the screw eye. Drill a 3/8" hole, insert the Kwik Tog so it expands behind the stucco.

Kwik Tog & Eye Loop (50) - NI-KT10

THIN WIRE NET CLIP

Great for small jobs, this stainless steel clip attaches netting to a structure without running cable. Not recommended for jobs over 5' x 5'.

Thin Wire Net Clip (100) - NI-WC10

"S" HOOK

Heavy duty stainless steel fastener can be secured with screws or fired-in pins.

"S" Hook SS (100) - NI-WC30

SCREW EYES (SMALL)

These screws for wood are very sturdy intermediate attachments.

Screw Eye Small, Galv (100) - NI-SE10
Screw Eye Small, SS (20) - NI-SE20

NET ACCESS CLIPS

Stainless steel net clips join pieces of netting to allow for removal of panels for access. New, thin design is hard to see.

2" Net Access Clips (100) - NZ-C200
3/4" Net Access Clips (100) - NZ-C340

NET SCISSORS

A must on any netting job.
TO-S100

STEALTHNET REPAIR TWINE

Use for invisible seams and to make minor repairs.

Black Net Twine
(500') - NO-TWB10
Stone Net Twine
(500') - NO-TWS10

NOTE: Magnets secure better to thicker metal surfaces than they do to thinner surfaces.
TIP... When using for a removable netting section, use hook turnbuckles at each end of the cable so both ends can be unhooked.

STEALTHNET ZIPPER ACCESS

Zippers can be net-ringed into the netting to create any sort of an opening.

Black Zipper (1) - NZ-B100
Black Zipper (3) - NZ-B300
Black Zipper (6) - NZ-B600

Stone Zipper (1) - NZ-S100
Stone Zipper (3) - NZ-S300
Stone Zipper (6) - NZ-S600
Stone Zipper (per ft.) - NZ-SCUS

SEPARATING ZIPPERS

Used to create a section of net that will fall open. Use this across the end of a trap door. Need a larger opening? Point the open end of the zipper at each other for a 16' opening.

8' Black Zipper **NZ-BS800**
8' Stone Zipper **NZ-SS800**

MAGNETS, ZIPPERS & CLIPS NET MAGNETS

Net Magnets come in handy when

drilling or screwing is not an option. They are extremely quick to secure in place and can be useful for following contours of a metal substrate, with or without wire cable. Can also be used for nets that need to be opened. Two models available. Use caution as these are not as strong as screwed fasteners.

NEODYMIUM NET MAGNETS
12lbs. Net Magnet for Cable (10) .625" Dia - NI-MG10
48lbs. Net Magnet for Cable (10) .977" Dia - NI-MG12
Do not use as corner attachments. Intermediate only.

The Use of StealthNet zippers can be installed to open netting for horizontal or vertical access using net rings. pg. 27

HVAC

Protective Pad
HV-PAD12

Intermediate
Pole Cable Support
HV-PO4

Corner Heavy-Duty
Pole Cable Support
HV-PO4

Each pole includes one protective pad.

SUPPORT POLES

These poles can be used to build raised netting systems. The poles can be used to keep the center cable higher (like a tent), or to raise a whole net system above a flat roof, or a roof covered with HVAC equipment.

The top of the pole has four holes designed to accommodate both perimeter net cable and turnbuckles. This flexibility allows the pole to accommodate a wide range of possible installations.

By tensioning the cables equally in each direction, the flat base will simply sit in place. Protective neoprene pads insure no damage is done to the roof.

HVAC PROTECTION NETTING SYSTEM

HVAC units provide birds with shelter (underneath the units), and a high perch to check out food and other opportunities (on top of the units).

Rooftop units can be difficult to protect. Installers generally screen off the bottoms, and put Daddi Long Legs on the top. The units need to be accessed for maintenance, and building owners generally don't like holes drilled in their roofs.

Our HVAC protection system offers many unique features:

- System protects top and space below the unit
- Corner Stand-off brackets raise net well above unit
- Brackets keep net away from the sides of the unit as well
- Brackets can usually mount to unit without screws
- Weighted hose secures to roof, no fasteners or holes necessary
- Hose can be lifted up for repair access
- Installed using most standard Bird Barrier items (StealthNet, cable, net-rings, tools etc.)
- Zippers can be installed for smaller access, or as pipes and other obstructions demand

Stand-off Bracket, 24"
