

INDOOR

SPARROW TRAP DOOR

Easy to Ready in Minutes

WORKS GREAT HIGH UP

The trap can be placed high up in the facility near the most bird activity. Put on a shelf or hang from a pipe. Set the trap to the open position and bait and check regularly. Multiple traps will be necessary in large facilities. Detailed instructions are included.

THIS IS SO YUM...
Wait, wait, WHAT!?

Damnit! Now I'm trapped inside! It is sooo boring in here. Jeez, how much longer!

CONVERT TO A MULTI-CATCH

The Sparrow Trap Door can be secured to the top of a Bird Barrier sparrow trap. The Trap Door captures the first bird and drops it into the cage trap. Once inside that bird attracts more birds. See page 66.

& 12.5" High When Closed

SOUND ATTRACTION

The Sparrow Trap Door is four times more effective with the optional audio attractor.

The call operates on an intermittent basis so birds don't get used to it. There are ten different programs to choose from. Use on the Trap Door, or to draw sparrows into a mist net or cage trap.

Audible sparrow call attracts the bird thus dramatically increases efficacy.

HIGH-REACH POLE MOUNTING & RETRIEVAL

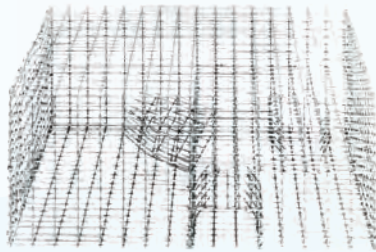

Now Sparrow Trap Doors can be positioned on high shelves and hung

from pipes (hanger included) from the safety of the ground. All Sparrow Trap Doors now ship with a pole attachment riveted to the back, which accepts Bird Barrier's aluminum extensio poles.

BIRD TRAPS

An Ethical Application

SPARROW TRAP

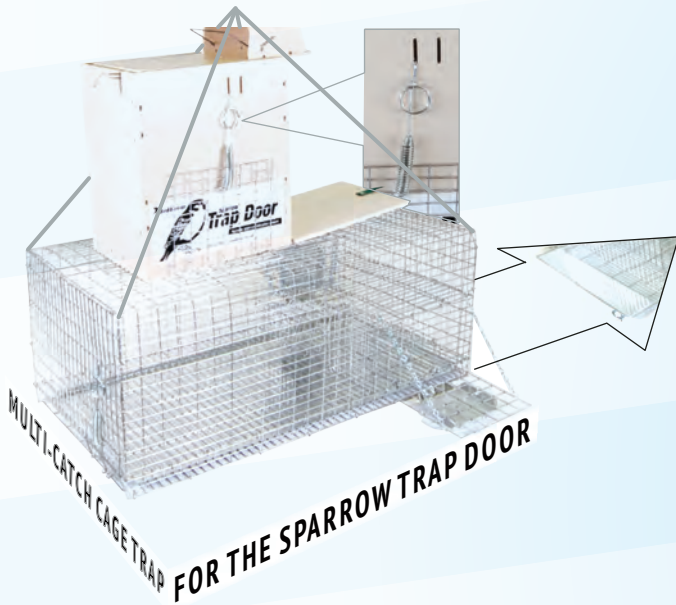

- Capacity: 12 birds
- Dimensions: 16" x 12" x 8"
- Two-chamber
- Bi-level
- Repeating trap
- Ideal for sparrows
- Unlike ground level traps, the birds enter the trap and immediately moves to the elevated 2nd level, which eliminates their feeling of entrapment and the need to emit a distress call.
- Shipping Weight: 4 lbs.

Sparrow Trap TT-SP10

- Dimensions: 36" x 24" x 10" High
- This trap has many innovative features including a divided trap with two top access doors
- Proven bi-level design
- Easy access to service feed and water
- Six entry funnel doors, three for each compartment
- Shipping weight: 14 lbs.

Repeating Sparrow Trap TT-SP50

- Turn your Sparrow Trap Door into a repeating trap.
- The first sparrow is caught and falls inside the cage trap. Once inside it sings happily and attracts other birds.
- Trap Door secures to the top with spring clips
- Can be hung from the ceiling with provided cable bridle. See above cables.
- Two "draw bridge" style patios provide safe entrance for birds and are hinged up for transport
- Secure inner chamber can be stocked with food and water
- Sanitary metal slide-out pan keeps all food and droppings inside the trap. See photo.
- Trap Door trap can be easily removed by unlatching the spring clips from the slots and sliding the trap forward while closing the top of the cage to eliminate the possibility of any birds escaping. See above.
- Includes food and water containers for humane treatment of birds
- See page 59 for details on sparrow Trap door.

Cage Trap for Sparrow Trap Door (ea.) TT-SP29

- Capacity: 18+ birds
- Easy Assembly
- Completely collapses to 1" for storage

Pigeon Trap TT-PI10 Pigeon Trap w/Shade TT-SW10

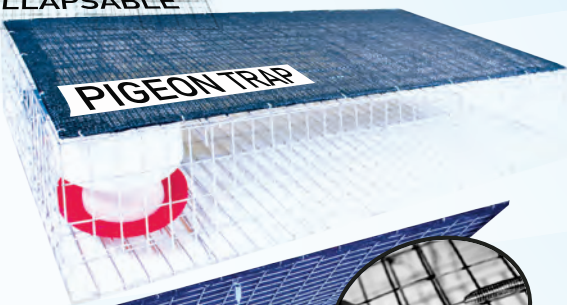

- Four one-way entry doors; one on each side
- Unique design: built-in feature for optional water feeder kit
- Shipping Weight: 14 lbs.

- Capacity: 10+ birds
- 35" x 16" x 8" High
- Easy to assemble
- Collapses to one inch for storage
- Shade screen

Collapsible Pigeon Trap TT-SW05

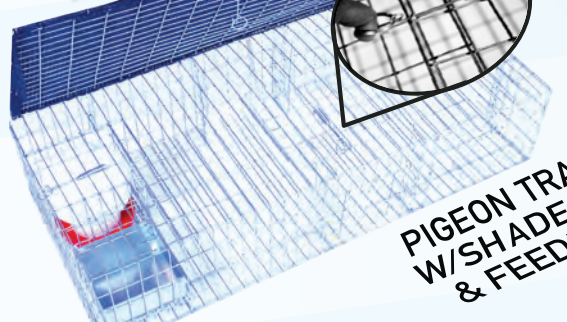

- Four one way entry doors
- Heavy 14 gauge galvanized welded wire
- Unique design, water/feeder kit can be added
- Centered top access door for easy removal of birds
