Multiple rows of Bird-Flite protect a steel beam from pigeons.

A single row of Bird-Flite keeps pigeons off of this ornamental ledge on a retail store.

This attractive structure is protected against pigeons by Bird-Flite spikes.

Low-Visibility

Clear polycarbonate base and thin stainless steel rods are nearly invisible even from short distances.

Easy to Install

The base can be glued or screwed in place. Available in one foot lengths, each section can be broken into smaller sections to accommodate any architectural configuration. Pieces can also be kinked or permanently bent to conform to sharp angles.

No Debris

Bird-Flite's wires are spaced 1.5 inches on center—far enough apart to repel pigeons, yet avoid entrapping debris, like paper, twigs, etc.

Humane

Bird-Flite's spikes are blunted, preventing injury to birds or unsuspecting workmen. Birds typically hover above products before loafing so they will not be harmed.
