A worker applies a row of Dura-Spike wide to a parapet using Bird Barrier Bond.

A single row of Dura-Spike is ideal protection for this pipe in a parking structure.

Two rows of Dura-Spike protect this wide ledge at a large industrial complex.

Easy Application

Dura-Spike is an all stainless steel spike that comes in three-foot lengths for quick and easy application. The base can be cut easily with snips or shears. Dura-Spike bends easily allowing it to easily accommodate curves and irregular surfaces conforming easily to the building's features.

How it Works

Pigeons and larger birds are not able to gain a foothold on the protected surface and are forced to take their mess elsewhere.

How to Install

Use the spacing guides (right) to determine the best model for the application. Clean the surface thoroughly, Secure using Bird Barrier Bond (see page 25) or screw it down.

Warranty

Dura-Spike is warranted for ten years and should perform for many more.

Totally Humane

The blunt tips on the ends of each spike cannot hurt birds or humans.

Space Saving Packaging

Dura-Spike stacks neatly, one row nesting neatly inside of another offering smaller boxes that take less room in the service vehicles.
