### Solar Panel Exclusion

Innovative clip and mesh system keeps all creatures from getting under solar arrays.

### Sound Deterrents

Devices scare away birds using various sonic and ultrasonic waves.

### Water Harrassment

Chase or harrass birds and other pests with a quick blast of water.

### Visual Deterrents

Reflective and holographic devices that scare birds away.

### Smell & Taste Deterrents

Irritate birds’ olfactory & taste senses to drive them away.

### Batcone

One way doors for bats, rodents and birds.

Bird Control Digital Photo Album

Remove the guess work; show your customers what their project will look like when it is protected by Bird Barrier products. Show them clear photos of products installed on a building just like theirs.

Photos are grouped by building problem area, like Loading Docks, Roofs, HVAC Equipment, etc. Open the folder, then either swipe photos to the left or right, or they will change every few seconds.

www.birdbarrier.com/salesbook

We need more photos. Send your before and after photos to marketing@birdbarrier.com.

Online Material Estimator

A fully integrated online tool that helps you with every aspect of your material estimate. Enter basic information that you collect on a job site and it does the rest.

Powerful Benefits
- Estimate multiple areas for one project and consolidate them at purchase
- Compare different products on the same part of the project
- Secure data saved for the next time you login. Save as many projects as you like in your profile.
- Make changes at any time if the project scope changes, or you just change your mind
- You can use your Bird Barrier account, a credit card, or your Univar account for purchases
- Creates material print-out for estimating labor or installation instructions
- Recommends tools and other accessories you may need
- StealthNet is often the most complicated product to estimate—the Estimator makes it easy
- Available 24 hours a day, 7 days a week

www.birdbarrier.com/estimator

See all the items you might need for a job, broken down by project. The Estimator recommends quantity and all your prices. You can even remove items that you already have in stock.
Bird Barrier’s technical training class has been attended by more than 3,000 professionals; many credit it with the beginning of their success.

One-Day Technical Training Class teaches the essentials of bird control.

Evaluate & Solve Bird Control Problem
Birds are intelligent creatures that present a problem for thousands of building owners, and an opportunity for you. This class gives you the tools to successfully plan and implement a bird control program for your customers. Gain the advantage you need with our one-day, hands-on class.

Using slides, video & hands-on product assembly, you will learn about:
» Bird biology
» Controlling pest birds
» Damage and diseases
» What attracts birds to certain sites
» Mechanical ledge products
» Exclusion Netting
» Safety and cleaning
» Site Evaluation
» Bidding Jobs and writing proposals
» Making a healthy profit in bird control

The class is hosted every other month in Carson, CA and East Rutherford, NJ (on Fridays) and can be taught in any location to a group of 15 students.

Sales Class teaches you how to find, qualify and sell profitable bird control jobs.

Let’s face it, finding and selling $12,000 bird jobs is not necessarily an easy proposition. The facility owner must understand the cost of the problem, and the installer must be able to convince them that the bird job is really an investment in their facility’s long-term welfare. For professionals used to selling recurring services, a one-time sale can be a challenge.

In Bird Barrier’s sales class you will learn step-by-step how to make money in this business.

You will learn:
» Creative ways to market your services
» How to pre-qualify the customer over the phone
» Tips for the meeting and site evaluation
» How to explain the cost of the problem to the customer
» How to agree on a scope of work
» How to present a professional proposal
» Tips for keeping the deal alive
» How to close the sale

For schedule and registration, visit: www.birdbarrier.com/training
Installation Videos - Learn how to install Bird Barrier products right in your office.

Product Installation:
- StealthNet
- Bird Shock Flex-Track
- Bird-Flite Spikes
- Dura-Spike
- Solar Panel Exclusion
- Bird-Coil
- Birdwire
- BirdSlide
- OvoControl
- Eagle Eye
- Traps
- Batcone
- Mist Nets
- Tree-Shock

Start making money right away. Watch Bird Barrier’s acclaimed installation videos and you will be ready to start a job right away.

Learn:
- Where to use the product
- Spacing and other specifications shown in clear illustrations
- How to use special tools and equipment
- How to install the product
- Tips for faster and better installations

The videos are clear and visually stimulating as they were shot by a professional crew. The close-up shots of the detail work are clear and well lit.

These videos are an excellent tool for both installers and sales people as it clearly demonstrates what it takes to get the job done. A team could watch these together and have with ample confidence to find, sell and install successful bird control systems.

Class Manual
Our text book has become the industry standard in bird control. It takes you step by step through the entire business of bird control:
- Access Equipment
- Architectural Terms
- Bird Habits
- Bird Pressure
- Cleaning and Disinfecting
- Cost/Pricing Estimates
- Damage and Disease
- Flock Dispersal
- Follow-Up

Product Display Case
Carry this handy case to customer meetings. It contains samples of all the products so they customer can get a real feel for what you are proposing. Some of the shelves actually slide out so you can put the product sample up on their building.

Safety Products & Training for Bird Control Professionals
Falls from elevations are the leading cause of injuries in many industries. Statistics show that most falls occur because the workers weren’t properly trained in identifying the needs for fall protection. In our training course students will learn from experts in fall protection and at the end of the program, will be able to demonstrate knowledge on key safety topics.

Bird Barrier offers Safety Training Classes in various locations. Private sessions are available at our customers’ locations. Call for more details.

For our Safety Catalog, visit: www.birdbARRIER.com.safety
Getting Started

Starter Tool Kit
You’ll have everything you need to get started in the lucrative business of bird control.

One of the single-most important aspects of a successful bird control business is tools and hardware. Virtually all installations depend upon the right tools and having the right hardware to match the substrate. Bird Barrier has assembled a comprehensive collection of tools, products, fasteners and adhesives, offering them at an extremely reasonable price, so you will have what you need to get started in the lucrative bird control business. All tools and hardware in the kit are displayed throughout the catalog.

Talk to an Expert. We will help you succeed: 800-503-5444.
Very Discreet
The Optical Gel dishes are only 2-1/2 inches in diameter and 7/8 inch in height. They cannot be seen from below.

How it Works
This multi-sensory bird repellent deters birds using sight, smell and touch. Birds see fire or smoke, although there isn’t any. They smell peppermint oil, which they hate. The Gel is sticky of the birds do touch it.

Totally Humane
Harmless to birds and humans alike.

Easy to Install
Remove covers from dishes and affix dishes to dry surfaces with silicone or other removable adhesive.

Safe for the Environment
Bird Barrier Optical Gel is made from all organic ingredients.

Longevity
The dishes are effective for 2 - 4 years. The site must be thoroughly cleaned first.

Installation Guidelines for Pigeons
Clean the site thoroughly before installation. (See opposite page for details.)

Nesting Sites: 6 in. maximum spacing

Night Roosting Sites: 8 in. maximum spacing

Day Roosting Sites: 10 in. maximum spacing

General guidelines for spacing of dishes for other species of bird are:
Gull: 12 inches
Corvids (crow, magpie, etc): 10 inches
Starling: 8 inches
Some testing may be needed to determine best placement for other bird species.
Optical Gel keeps all birds off all structures without harming them. It does so by altering their behavior, not by acting as a physical barrier. Once applied, birds will completely desert a habitat, even one they have been using for years.

Optical Gel is applied in low-profile application dishes, only 8mm high. It has successfully repelled birds from protected “heavy pressure” sites, and is ideal for sites where mechanical deterrents can’t be used.

What Birds See
The ultraviolet light spectrum appears to birds as fire.

What You See

Multi-Sensory Bird Repellent

**SIGHT** » Birds see fire or smoke, although there isn’t any

**SMELL** » Birds smell peppermint oil, which they hate

**TOUCH** » Sticky if they do touch it

Easy to Apply, and Effective

- Pre-loaded dishes are fast and easy to install
- Secure to the surface with a small dab of silicone
- Firm density won’t run, even when mounted upside down
- Resistant to high & low temperature, rain & snow
- 2 - 4 years of effectiveness (site must be thoroughly cleaned first)
- Use anywhere, especially where mechanical systems like netting and spikes aren’t optimal
- 24 per pack
- Minimum Risk Pesticide, FIFRA Exempt
WHERE TO USE
Any enclosed or semi-enclosed area, opening or configuration where pest birds are to be excluded, including open beam structures, loading docks, buildings façades, courtyards, bridges, etc.

TARGET BIRD
All species

BIRD PRESSURE
Heavy

MATERIAL
Polyethylene twine and stainless steel installation hardware

INSTALLATION
Netting attached to pre-installed cable system

INSTALLATION LEVEL
Involved

Almost Invisible
StealthNet is available in black, stone (beige) and white. The netting is composed of very thin, ultra-strong, knotted strands of polyethylene twine.

Long-Lasting
StealthNet is manufactured using the most advanced technology in the world, and has been developed to withstand a wide range of environmental conditions. Polyethylene is the most ultra-violet resistant netting material available and StealthNet has extra U.V. stabilizers added in its raw materials, creating a durable, long-lasting net.

Installation
StealthNet can be installed using a variety of fasteners created specifically for your building’s needs. Whether it’s masonry, steel or wood, we offer a discrete suspension system for a maintenance-free permanent installation.

Totally Humane
StealthNet provides a harmless, impenetrable barrier against all pest birds.

The Benefits of StealthNet
Six strands of polyethylene, each 12/1000 in. (hence the name 12/6), are wrapped rope-like into one strong, rot-resistant, U.V. protected twine. With a breaking strength of 52 lbs. per twisted strand, StealthNet is the strongest polyethylene netting available in the world.

StealthNet’s U.V.-treatment and color pigmentation are embedded in the composition (not just dipped), making the net more resistant to the effects of the sun with a more consistent coloring throughout.

Benefits
» Effective against all bird species
» Highly resistant to ultraviolet rays
» Flame-resistant (also available flame-proof, pg. 14)
» Available in a variety of colors
» Available in 7 standard and cut to your custom sizes
» Nearly invisible in most situations
» Low-profile installation system
» Twine is twisted and knotted
» Will not rot or absorb water
» Protecting structures worldwide
» Specified on historical properties

Warranty
Black StealthNet: 10 years
Stone & White StealthNet: 3 years
Extended warranties for indoor applications are available. See page 11 for more details.
**Four sizes of StealthNet offer complete exclusion.**

**2 in. Mesh**
Pigeons and larger birds

**1-1/8 in. Mesh**
Starlings, grackles, blackbirds, etc.

**3/4 in. Mesh**
Sparrows, swallows & other small birds

**4 in. Mesh**
For gulls and other aquatic birds. It is generally installed horizontally over roofs and bodies of water.

---

**Installation of Nets**

StealthNet is attached to a 5/64-inch (2mm) perimeter cable which is supported by a wide variety of intermediate and corner attachments designed for masonry, wood or steel. The cable is tensioned using turnbuckles and the netting is attached to the cable using net rings.

**Custom-Cut Nets**

Custom-cut nets are available in sizes up to 100 x 200 ft. The cutting fee is included in the price per square foot.
Ultra StealthNet

Bird Barrier’s Ultra StealthNet conformst to NFPA 701, which states that the net is self-extinguishing (it will put itself out after being exposed to an open flame). This net is ideal for interior applications like airplane hangars, sports facilities and other sensitive areas. It is also ideal for netting jobs around residential settings, like condos and apartment buildings. The Ultra StealthNet is distinguished by a blue strand twisted in with the black strands.

Conforms to NFPA 701
Demand the Blue Strand!

No-Flame StealthNet

Bird Barrier’s No-Flame StealthNet conforms to NFPA 701, which states that the net is self-extinguishing (it will put itself out after being exposed to an open flame). This net is ideal for interior applications like airplane hangars, sports facilities and other sensitive areas. It is also ideal for netting jobs around residential settings, like condos and apartment buildings. The No-Flame StealthNet is distinguished by a blue strand twisted in with the black strands.

Conforms to NFPA 701
Demand the Blue Strand!

Bat Net

Special knotted netting just for bats. Our 3/8” polyethylene knotted mesh is ideal for all bat species, and is far stronger than other nets available. The black mono-filament withstands ultraviolet radiation extremely well, and is very hard to see when installed in shadowed areas. Another great feature is the large sizes available so any bat exclusion is possible with a single sheet, eliminating the need for seams.

Stainless Steel Wire Cloth

This high quality stainless steel hardware cloth is meant for difficult Bat exclusion projects. The mesh is on 1/2” centers and offers an effective long lasting exclusion screen where other products might fail. Four feet wide, this mesh available custom cut in 1 foot increments (min. order 4 sq. ft.) and is cut to your order. Lengths up to 100’ long are available in a single piece. Please obtain delivery quotes for large orders.

Black PVC-Coated Galvanized Mesh

Black PVC-coated, 19-gauge, 1/2” wire mesh offers an effective long lasting exclusion screen where other products might fail. Available in three widths (6”, 8”, 12”) and custom cut per square foot (four foot wide and 1 foot increments). It can be bent into custom shapes and glued or screwed in place.

Solar Panel Exclusion Kits, See page 50
Net Ring and Net Ring Tools

Net rings hold the netting to the cable and are applied using one of four tools. Each tool has distinct features; most professionals have at least two of the following tools in their tool box.

Hand Net Ring Tool
The standard tool for attaching netting to cable, it accepts a cartridge of 50 net rings for fast and easy use.
- Great for small jobs
- Light (0.5 lbs.)
- Affordable (relative to the other tools)
- Very maneuverable
- Fast and easy to re-load

<table>

</tr>
</tbody>
</table>

Pneumatic Net Ring Tool
These fast operating tools are a must on large netting projects. They will save you time and money. They run off a compressor and hold 100 rings and uses the 1/2-inch ring size. Pneumatic rings are packed in 10,000 rings/box. Requires a 95 PSI-capable compressor.
- Fast and reliable
- Agile nose gets into tight spaces
- Holds 100 rings
- 2.8 lbs.

</tbody>
</table>

Black Rings for Hand Net Ring Tool (above)
For the first time in the industry, Black rings are available for the P7 hand ringer. Now you can cut way down on the visibility of rings on all blac netting projects.
- Make invisible seams
- Almost invisible perimeter cable
- Invisible repairs

| Black Net Rings (2,500) | TH-B100 |

“Ringer” Net Ring Tool
“Ringer” uses a 9/16” net ring and has a handle like grip that helps eliminate hand, wrist and forearm fatigue when the job requires a lot of net rings.

<table>

Netting installed 18 in. under this hangar completely excludes birds from the structure.
StealthNet installed under eaves prevents swallows from building mud nests.
Vehicles parked under this hospital portico no longer suffer damage from bird droppings.
Selecting the Right Turnbuckle

The cable must be tensioned properly to insure a secure installation. Use small turnbuckle for cable runs under 25 ft., medium turnbuckle for runs 25 to 75 ft., and large turnbuckle for runs over 75 ft.

**Galvanized Turnbuckles**

Use galvanized for dry, salt-free climates with galvanized net rings and net cable. 10 per pack.

- Sm. Turnbuckle Galv. (10) NT-G100
- Med. Turnbuckle Galv. (10) NT-G200
- Lg. Turnbuckle Galv. (10) NT-G300

**Stainless Steel Turnbuckles**

Stainless steel is best for wet or salty climates. Use with stainless steel cable and net rings. 10 per pack.

- Sm. Turnbuckle S.S. (10) NT-S100
- Med. Turnbuckle S.S. (10) NT-S200
- Lg. Turnbuckle S.S. (10) NT-S300

Net Cable

Our 5/64” (2mm) diameter 7x7 construction cable is the standard for perimeter support. It is available in galvanized or stainless steel. Stainless steel is recommended for installations near heavy moisture, chemical environs or salt-laden air.

- Net Cable Galv. (250 ft) NC-G250
- Net Cable Galv. (500 ft) NC-G500
- Net Cable S.S. (250 ft) NC-S250
- Net Cable S.S. (500 ft) NC-S500

**Cable Cutter**

The sharpest, longest-lasting and easiest tool to use for cutting heavy-duty cable. The overlapping heads give a clean cut up to 5/32” (4mm). The tool features a spring loaded rubber grip handle and a security locking latch.

- Cable Cutter (ea.) TO-CC10

Cable Cutter

Use two ferrules at every end or loop for added security

Ferrules

These high-quality ferrules are designed for 5/64” (2mm) cable. Aluminum for galvanized cable and copper for stainless steel. Two ferrules should be used per cable loop attachment. A special ratchet crimp tool is necessary. 100 per pack.

- Copper Ferrules 2.5mm NC-N100
- Alum. Ferrules 2.5mm NC-N200

**Heavy Duty Installation**

Heavy duty cable and ferrules should be used on oversized or extra-heavy applications only. If heavy forces from wind or snow are anticipated this heavy duty hardware should be considered. Call our offices for more information.

**Heavy Duty Net Cable**

This 5/32-inch cable should be used where extra strength is desired such as where StealthNet not supported for runs of 100 feet or more.

- Galvanized (500 ft) NC-G532
- Stainless Steel (500 ft) NC-S532

**Heavy Duty Ferrules**

These ferrules are to be used with the heavy duty net cable. Use two per end/loop end and crimp twice per Ferrule 100 per pack.

- 5/32-inch Ferrules NC-N500

**Heavy Duty Eye Bolt**

When adding extra tension to heavier cable it’s important to use a corner anchor that will not bend or break.

- Heavy Duty Eye Bolt (10) NB-EB30

**Heavy Duty Crimper**

Use this tool with heavy duty ferrules.

- Crimp Tool TN-R300
## Corner Attachments • Hardware

### The Importance of Corner Attachments

The most important part of a netting job is the corners (where the cables end or turn corners) due to the tension applied by the turnbuckles and the weight of the net. Strong cable-ends and corners are achieved using the correct selection from a wide variety of anchoring systems enabling you to secure the system to any substrate.

### Netbolts - Galvanized

This high-load bearing expansion bolt is the perfect anchor for most masonry, stone or concrete corner/end attachments. Use the smaller M6 for cable runs under 100’ and the larger M8 for runs over 100’. 10 per pack.

<table>
<thead>

</tbody>
</table>

### Hilti .27 Shot

Hilti’s powder-actuated tools are powered by easy-to-use shot cartridges. Simply insert the cartridge up through the bottom of the tool, and they are in place and ready to go. Bird Barrier carries the heavy charge (red) because the tool is adjustable and can be backed down to much less power if necessary. Ten shots per strip, 100 shots per pack.

<table>
<thead>
<tr>
<th>Item Description</th>
<th>Code</th>

</thead>
<tbody>
<tr>
<td>Hilti Shot</td>
<td>TO-H250</td>
</tr>
</tbody>
</table>
The Importance of Intermediate Attachments

Intermediate attachments hold cable against the wall between corner attachments.

We recommend:
- 2" netting = one every 2-3 feet
- 1-1/8" netting = one every 2 feet
- 3/4" netting = one every 1.5 feet

Multi-Purpose Cable Bracket

This versatile stainless steel bracket can be used as a corner or intermediate attachment, and installed as a permanent fixture or as a quick-release cable holder.

A) With Hilti Pin  
B) Bracket w/13/64" Hole  
C) Bracket w/1/4" Hole  
D) Stainless Steel

Net Spike

This hammer-in attachment is the strongest attachment available for stone, concrete or solid brick. Does not require a plastic anchor sleeve, the bent shaft holds it securely in place. Zinc or Stainless Steel coated.

- Net Spike (100)  
- Net Spike SS (100)  
- 4.8mm Drill Bit (for both)

Net Loop

Low profile, stainless steel intermediate attachment for wood or sheet metal. Secure with self tapping screw.

- Net Loop (100)

Lag Screw

Screw directly into wood, or use with an anchor for masonry.

- Stainless Sm. (100)  
- Anchor Sm. (100)  
- Galvanized Lg. (100)

Lag Screw Driver

Drive our Lag screws into wood and plastic anchors with this tool that fits into the chuck of your hand drill.

- Lag Screw Driver (ea.)

Girder Clips

This strong, hammer-on clip allows for cable attachment to steel beams. Hammer the clip onto the edge of an I-Beam. Available in galvanized and Stainless Steel. Galvanized - Run the cable inside the jaws (not the hole). Stainless Steel - Run the cable through the hole.

- A) 3/32"-9/64" (100)  
- B) 1/8"-1/4" (100)  
- C) 5/16"-1/2" (100)  
- D) 9/16"-3/4" (100)  
- E) S.S. 1/8" - 1/4" (100)  
- F) S.S. 5/16" - 1/2" (100)  
- G) S.S. 9/16" - 3/4" (100)

Hilti Loop - Open and Closed

Constructed of high quality, zinc-plated steel, the Hilti Loop is an easy-to-use attachment for stone, concrete and brick. Drill a hole and hammer it home. Open option for removable nets.

- Hilti Closed Loop (100)  
- Hilti Open Loop (100)  
- 8mm Drill Bit (for both)

Kwik Tog & Eye Loop (for Stucco)

Stucco is one of the most challenging substrates for bird control. This durable plastic attachment affords a solid base for the screw eye. Drill a 3/8" hole, insert the Kwik Tog so it expands behind the stucco.

- Kwik Tog & Eye Loop (50)

Thin Wire Net Clip

Great for small jobs, this stainless steel clip attaches netting to a structure without running cable. Not recommended for jobs over 5’ x 5’.

- Thin Wire Net Clip (100)

“S” Hook

Heavy duty stainless steel fastener can be secured with screws or fired-in pins.

- “S” Hook SS (100)

Screw Eyes (Small)

These screws for wood are very sturdy intermediate attachments.

- Screw Eye Small, Galv (100)  
- Screw Eye Small, SS (20)

Screw Eye Driver

Fits in the chuck of your power drill and allows you to drive small and heavy duty screw eyes into wood fast and easy. Just get the eye started, slip the Driver over the loop and screw it in.

- Screw Eye Driver (ea.)
Magnets, Zippers and Clips

Net Magnets
Net Magnets come in handy when drilling or screwing is not an option. They are extremely quick to secure in place and can be useful for following contours of a metal substrate, with or without wire cable. Can also be used for nets that need to be opened. Two models available. Use caution as these are not as strong as screwed fasteners.

Net Magnets for Cable
These magnets provide a strong anchor for cable systems.

- 15 lbs. Net Magnet for Cable (10), 1.4in. Diameter: NI-MG06
- 40 lbs. Net Magnet for Cable (10), 2 in. Diameter: NI-MG08

Net Magnets for Netting
Provides a good hold for small net jobs where perimeter cable is not being used.

- 12 lbs. Net Magnet for Netting (10), .625 in. Diameter: NI-MG10

NOTE Magnets secure better to thicker metal surfaces than they do to thinner surfaces.

TIP When using for a removable netting section, use hook turnbuckles at each end of the cable so both ends can be unhooked.

Net Magnets are not for use as corner attachments, intermediates only.

The Use of Net Zippers
StealthNet zippers can be installed to open netting for horizontal or vertical access, using net rings.

Closed-End Zippers
Zippers can be net-ringed into the netting to create any sort of an opening. Heavy duty marine construction insures long-life. Zippers are now available up to 300 feet!

- 1' Black Zipper (ea.): NZ-B100
- 3' Black Zipper (ea.): NZ-B300
- 6' Black Zipper (ea.): NZ-B600
- Black Zipper (per ft.): NZ-BCUS
- 1' Stone Zipper (ea.): NZ-S100
- 3' Stone Zipper (ea.): NZ-S300
- 6' Stone Zipper (ea.): NZ-S600
- Stone Zipper (per ft.): NZ-SCUS
- 1' White Zipper (ea.): NZ-W100
- 3' White Zipper (ea.): NZ-W300
- 6' White Zipper (ea.): NZ-W600
- White Zipper (per ft.): NZ-WCUS

Separating Zippers
Used to create a section of net that will fall open. Use this across the end of a trap door. Need a larger opening? Point the open end of the zipper at each other for a 16’ opening.

- 8’ Black Zipper: NZ-BS800
- 8’ Stone Zipper: NZ-SS800
- 8’ White Zipper: NZ-WS800

Net Access Clips
Stainless steel net clips join pieces of netting to allow for removal of panels for access. New, thin design is hard to see.

- 2” Net Access Clips (100): NZ-C200
- 3/4” Net Access Clips (100): NZ-C340

StealthNet Repair Twine
Use for invisible seams and to make minor repairs.

- Black Net Twine (500’): NO-TWB10
- Stone Net Twine (500’): NO-TWS10
- White Net Twine (500’): NO-TWT10

Net Scissors
A must on any netting job.

Net Scissors (ea.): TO-S100

HVAC Netting System

HVAC units provide birds with shelter (underneath the units), and a high perch to check out food and other opportunities (on top of the units).

Rooftop units can be difficult to protect. Installers generally screen off the bottoms, and put Daddi Long Legs on the top. The units need to be accessed for maintenance, and building owners generally don’t like holes drilled in their roofs.

Our HVAC protection system offers many unique features:

- System protects top and space below the unit
- Corner Stand-off brackets raise net well above unit
- Brackets keep net away from the sides of the unit as well
- Brackets can usually mount to unit without screws
- Weighted hose secures to roof, no fasteners or holes necessary
- Hose can be lifted up for repair access
- Installed using most standard Bird Barrier items (StealthNet, cable, net-rings, tools etc.)
- Zippers can be installed for smaller access, or as pipes and other obstructions demand

Bird Barrier provides an online HVAC Calculator that will generate a list of the materials you need and the cost for each. hvac.birdbarrier.com

Telescoping Support Poles

These poles can be used to build raised netting systems. The poles can be used to keep the center cable higher (like a tent), or to raise a whole net system above a flat roof, or a roof covered with HVAC equipment.

The top of the pole has four holes designed to accommodate both perimeter net cable and turnbuckles. This flexibility allows the pole to accommodate a wide range of possible installations. The bolts halfway up the poles can be loosened to adjust the poles to the perfect height. By tensioning the cables equally in each direction, the flat base will simply sit in place. Protective neoprene pads insure no damage is done to the roof. Extend poles from 4.5 ft. to 8 ft. Each pole includes one protective pad.

</tbody>
</table>

The telescopic support poles allow netting to be installed securely over the heads of workers and equipment.

StealthNet installed underneath pipes and beams in a newly constructed barn keeps all birds out. The zipper being installed allows access to the lights.

Stealth Net®
Adjustable Cable Support Poles are placed evenly across a large roof to support the wires. A sea of wires and lines turns the roof into a daunting challenge for large sea birds. Wires are suspended high enough overhead to allow for unfettered access to the roof.

**Where to use Gridwire**

Gridwire is typically installed 6-8 feet above a large flat roof to keep gulls and other sea birds from landing.

**What is Gridwire?**

A system of poles, cables and wires installed so that wires make up large squares or rectangles, like a very large mesh net.

**How it Works**

Gulls see the wires as they approach the roof and become nervous; they are scared of becoming trapped in a zone they don’t understand.

**Hard to See**

If the posts are set in from the edge of the roof the system is invisible from below.

**Humane**

Even if the gulls fly into the zone they cannot be hurt by the wires, and they can easily escape.

**Gridwire**

Gridwire or polyethylene Floresent GridTwine (more visible to birds) can be suspended in various horizontal and vertical patterns to deter large aquatic birds. Grid spacings are site and species specific. You can protect lakes, parking lots, warehouse roofs, etc. from gulls, geese and other large aquatic birds.

- Pole Cable Support (see above) HV-P04

**Gridwire™**
Bird Barrier Bond
Yellow Tube - 5 Year Warranty
An exceptionally strong, flexible, adhesive. It handles dramatic temperature changes without cracking. Full cure is in 24 hours at normal temperatures.
• Securely holds metals and plastics to wood, steel, sheet metal, concrete, brick and most building substrates.
• Gray in color
• Excellent UV characteristics
• Cleanup is with soap and water. Apply wearing surgical gloves.
• Green - Moisture curable, solvent-free formula

New Bond 10.2 oz. (ea.) HA-BB03

E6100 - 1 Year Warranty
Strong, flexible, quick cure and ideal for interior applications out of the sun.
• Securely holds metals and plastics to wood, steel, sheet metal, concrete, brick and most building substrates.
• Clear in color

Original Bond 10.2 oz. (ea.) HA-BB04

Bond Guidelines 10.2 oz.

Bird Barrier Super Bond
Occasionally you can’t wait for the regular bond to cure. Bird Barrier Super Bond cures in about one hour, so you can secure your products and be on your way. Requires Applicator & nozzles. 50 ml.

Super Bond Tube (2 part) HA-BS01
Super Bond Applicator (ea.) HA-BS02
Super Bond Nozzles (12) HA-BS03

Super Bond Guidelines

Bird-Flite 8 feet
Birdwire Bases 40 bases
Coil clips 60 clips
DLL PVC Bases 10 bases

Please Note: Bird Barrier Bond and Super Bond will not adequately adhere to nor is recommended for use with a fluoropolymer paint. This paint is marketed by some companies under the “Teflon”, “Hylar”, and “Kynar” brand names as coatings for anti-friction, anti-graffiti, etc. There is no warranty coverage for Bond applied to these surfaces.
Easy to Install
The Delrin (plastic) base can be screwed into most surfaces and comes with a 1/4" adhesive neoprene gasket. A PVC base adapter is available for glue-on applications. When placed together in groups, overlap the tips 4 - 6 inches.

How it Works
Thin, stainless steel rods rotate in the breeze and wave menacingly, interfering with birds’ wings as they attempt to land.

Removable
The center spindle can be easily separated from the base to access the area it is protecting.

Hard to See
The Daddi Long Legs is inconspicuous from short distances and practically invisible from afar. Its unobtrusive design allows for use in even high visibility areas like shopping/walking promenades and parking lots.

Humane
The waving rods have plastic tips to prevent injury to birds or humans.

Daddi Long Legs (ea.)

<table>

</tbody>
</table>

**Mounting Daddi Long Legs**

- **Boat Base**: This Lexan adapter attaches to the Daddi Long Legs base. It attaches to your boat with a bungee cord or rope.
- **Sandbag Base**: The weighted sandbag base can be used in areas where the standard boat base is not appropriate.
- **Boat Railing Mount**: When birds consider your boat’s railing a perfect perch, attach a Daddi Long Legs with our boat railing mount.
- **Magnetic Base**: Magnets stick best to thicker metal. These magnets have not been wind tunnel tested. Exercise caution when using. Daddi Long Legs should be secured with a safety tether of some sort when magnets are used. Caution, many parking lot lights are actually made from aluminum which is not magnetic. Magnets stick best to flat surfaces, use caution on curved surfaces.

**New Base!**
Now, Daddi Long Legs can be glued directly to the surface, a PVC base is no longer necessary. Make sure glue comes up through all the screw holes.
Flex-Track protects straight ledges, and curves easily to protect sign letters.

3) Jumpers snap quickly to the track, making it easy to power multiple tracks.

4) A charger unit mounts to the building and sends intermittent power down the two conductors.

5) Quick connectors are used every 50 feet, or wherever else connections are needed.

Corner Quick Connectors make 90 degree angles a snap.

Important Note: Electrified systems are active systems. They require regular maintenance.

WHERE TO USE
Any surface where total exclusion is the goal, and low visibility is key; parapets, roof peaks, beams, ledges.

TARGET BIRD
All species

BIRD PRESSURE
All pressure levels

MATERIAL
UV-stabilized PVC and Stainless Steel

INSTALLATION
Track glues to surface, electrical connectors allow current to flow from one track to the next.

INSTALLATION LEVEL
Somewhat involved

U.S. PATENTS:
7,481,021 • 8,293,044 • 8,430,063 • 8,434,209 • 8,567,111, U.S. Design Patent: D684,235 S

Multiple rows of Flex-Track installed on this roof prevent birds from landing in this open space.

Workers wearing fall prevention equipment install miles of Bird-Shock on a new, prominent DC structure.

Stores want to protect their image from bird dropping mess. Flex-Track is a discreet solution.

Patented
Bird-Shock Flex-Track is so good, and unique, it has been granted several patents by the US Patent and Trademark Office.

Flexible and Adaptable
This low-profile electrified track conforms to any architectural configuration. Flex-Track curves up and down, and side to side; and the stainless steel braid gently follows the UV-stabilized PVC base without wrinkling.

Almost Invisible
At only one-quarter of an inch high, and available in five different colors, Flex-Track is hard to see close-up, and invisible from a distance. It is not seen looking up from below.

Long-Lasting
Made from UV-stabilized PVC, and Stainless Steel, Flex-Track will be in service far longer than its five-year warranty.

Humane
The intermittent shock is memorable, but does not hurt the birds; it simply teaches them to stay away, long-term.

Bird-Shock: Active Bird Control
Bird-Shock Flex-Track has changed the face of the bird control industry. One product is able to protect a wide variety of surfaces from all bird species, while at the same time being virtually invisible, and incredibly durable.

© Copyright 2017 Bird Barrier America, Inc.
**Bird-Shock Flex-Track**
The tracks come in 50-foot lengths. Each roll includes 11 straight connections and nine corner connections (crimp style, not Quick Connectors), which will accommodate normal applications.

**Recommended Spacing**
One row of Flex-Track can protect the same width ledge as multiple rows of other products. Labor and material are therefore much less. Often just one row on the outer edge is enough.

**Quick Connectors**

**Quick Straight Connectors**
Fast and easy to install, attractive and ultra durable. Saves labor time and provides for a long-lasting installation. 20-pack.

- Straight Connectors (20) BS-Q06

**Quick Corner Connectors**
This connector is revolutionaly. It is low profile and features copper conductors over the entire surface. Straight cut the track, lay it inside the connector and snap the durable top down for an attractive connection.

- Corner Connectors (10) BS-Q07

**Anti-water damming pads**
Anti-water damming pads stuck every 12 inches will allow water to flow under the track. 10 pads are included with each roll of track.

Standard Connectors
Some complicated projects need more connections. The kits below are available in addition to the standard set that comes with the flex-track. A. Corner (100 male, 100 female). B. T-Junction (100 male, 100 female, 50 piggyback). C. Straight (100 male, 100 female). D. Female Snap Tap (50 taps/kit)

A) Corner Connector Kit (ea.) BS-Q20
B) T-Junction Kit (ea.) BS-Q10
C) Straight Connector Kit (ea.) BS-Q15
D) Connector Female Snap Tap BS-QSK

Flex Track Lead-out Wire
Twisted copper, 14 gauge double wire is easy to cut, strip & crimp. Available in 3 colors to match your job.

| Lead Wire, black (50 ft.) | BS-LW10 |
| Lead Wire, black (250 ft.) | BS-LW65 |
| Lead Wire, beige (50 ft.) | BS-LW30 |
| Lead Wire, beige (250 ft.) | BS-LW60 |
| Lead Wire, gray (50 ft.) | BS-LW15 |
| Lead Wire, gray (250 ft.) | BS-LW70 |

Lead Wire Guides
New, smaller and black for a less visible, tighter job.

Lead Wire Guides (100) BS-LW45

Tools & Accessories

Connector Crimp Tool
Solid connections are a must for a long-lasting application. This tool delivers the perfect crimp.

Connector Crimp Tool (ea.) TO-Q20

Deluxe Wire Stripping Tool
This elegant tool easily strips wires, completely. It grabs, cuts and pulls the wire, you just squeeze. Use the #10 or #8 opening.

Deluxe Wire Stripping Tool TO-Q15

Warning Labels
Bold, plastic warning labels should be placed prominently. Glue or screw to the ledge or side of the building. 10/pack.

Warning Labels (10) BS-WL10

Bird Barrier Bond
Bird Barrier Bond should be used to secure Bird-Shock Flex-Track to clean surfaces. A 10.2 oz. tube secures 30 - 35 ft. of track

New Bond 10.2 oz. (ea.) HA-BB03
Five Year Guarantee
E6100 Clear 10.2 oz. (ea.) HA-BB04
One Year Guarantee

See page 22 for important Bond information.

Bird Shock® Cellular Track Monitor
With the revolutionary, new alarm you are always only a text message away from knowing your track’s condition and voltage. Instead of taking hours inspecting your track or wondering if it’s working properly, Track Alarm will notify you within seconds of any track-related issue.

• Works with all chargers and track systems
• Receive Real-Time Alerts of your track condition via text or e-mail
• Set a Low-Voltage threshold to fit your needs
• Monitor your track status via a web-site, free mobile app or text
• View historical data of your track via the web-site or app
• Add additional users to your monitoring system so they can receive important alerts too
• Uses Solar Power and Cellular Technology, making it possible to easily install anywhere on your track (On average can run 30 days without direct sun)

Not available outside the US

Cellular Monitor BS-TE20

Attaching to your System
The Track Monitor has a hot and ground post, just like the chargers used to power all electrified track systems. The Track Monitor can be connected to the charger or the track. It can monitor an entire system at the charger, or a single length of track. It cannot monitor multiple tracks. Bird Barrier recommends connecting the Track Monitor directly to the charger, especially if the charger has multiple lead wires going to multiple tracks. Please call our offices for more details.
**Standard Chargers**

**Small 120v. Plug-In Charger**
Weatherproof, can be mounted outside (but make sure the plug itself is in a weatherproof housing).

- **Input Voltage:** 120 VAC
- **Output Voltage (max):** 9kV +/- 10%
- **Output Pulse Width at 500 Ohms:** 100 μS
- **Output at 500 Ohms:** 2.4kV, 0.16J

Sm. Plug-In Charger BS-CP30

**Small 12v. Solar Charger**
Ideal for smaller projects. Features connectors on the bottom and an on/off switch.

- **Input Voltage:** 12V DC
- **Output Voltage (max):** 8.6kV +/- 10%
- **Output Pulse Width at 500 Ohms:** 25μS
- **Output at 100 Ohms:** 3.5A

Sm. 12v. Solar Charger BS-CS30
Replacement Battery BS-CS25

*Attach battery leads and charge for 2 days before activating.*

- **These chargers are approved for use in Canada.**

**Large Birds / Large Jobs**

These powerful chargers are capable of handling large runs of Flex-Track. They require specific installation methods and the use of a digital track tester.

**NOTE:** Installation of these units without regard to the installation instructions can result in visible and audible arcing or sparking. Please use appropriate care and call our specialists for job-specific recommendations.

**Large 120v. Plug-In Charger**
This charger is weatherproof, but must be plugged into a weatherproof receptacle. It features a blinking indicator light when operating. Powerful enough for most jobs.

- **Input Voltage:** 120 Vac
- **Output Voltage (max):** 8.8kV +/- 10%
- **Output Pulse Width at 500 Ohms:** 25μS
- **Output at 500 Ohms:** 5.6kV, 1.3J

Lg. Plug-In Charger BS-CP25

**Large 12v. Solar Charger**
This solar powerhouse delivers plenty of shock and can be installed anywhere that gets several hours of sunlight every day.

- **Input Voltage:** 12Vdc
- **Output Voltage (max):** 8.6kV (+/-) 10%
- **Output Pulse Width at 500Ohms:** 25μS
- **Output at 500 Ohms:** 5.4kV, 0.33J

Lg. 12v. Solar Charger BS-CS20
Replacement Battery BS-CS25

**Charger Accessories**

**Battery Trickle Charger**
Charge Solar Charger batteries quickly or during extended periods of cloudy weather.

- **Charge:** BS-TE30

**Digital Voltage Tester**
Make sure your system is sending the correct amount of electricity. Tester reads in 1,000-volt increments.

- **Voltage Tester:** BS-TD10

**Power Indicator**
Attach these to the track and the building. Flashing indicates the system is functioning properly. Can be seen from distance at night.

- **Voltage Indicator:** BS-TE15

---

Talk to an Expert. We will help you succeed: 800-503-5444.
Easy Application

Tree-Shock is easy to mount and connect using special ties that wrap around smaller branches that can also be attached to larger branches using aluminum nails. NOTE: Working in and around trees can be dangerous; using professional installers is recommended.

How It Works

When the bird/animal’s foot touches the positive and negatively-charged wires, it gets a shock that trains them to stay away.

Virtually Invisible

Tree-Shock was designed to have a unique, aesthetically-pleasing appearance.

Totally Humane

The intermittent shock is painful, but does not hurt the birds; it simply teaches them to stay away, long-term.

Patent Pending. The Tree-Shock™ system is a Bird Barrier trademark, as is the shape, style and overall appearance of the product. Look for this unique appearance to ensure it is a genuine Bird Barrier Tree-Shock™ system™ product.
**The Tree-Shock™ System**
Durable PVC tubing wrapped with stainless steel wire. All sections include male connectors on one end (except for the 250 and 500 ft.). Female connectors can be added to the other end to connect sections together.

**Holiday Light Method:** When small birds land in the canopy of the tree (leaves, smaller branches), it may be advisable to protect the tree from the outside. Birds will land on the perches (the Tree-Shock™ system strung from limb to limb), and get shocked before going deeper into the tree.
Low-Visibility
Clear polycarbonate base and thin stainless steel rods are nearly invisible even from short distances.

Easy to Install
The base can be glued or screwed in place. Available in one foot lengths, each section can be broken into smaller sections to accommodate any architectural configuration. Pieces can also be kinked or permanently bent to conform to sharp angles.

No Debris
Bird-Flite’s wires are spaced 1.5 inches on center—far enough apart to repel pigeons, yet avoid entrapping debris, like paper, twigs, etc.

Humane
Bird-Flite’s spikes are blunted, preventing injury to birds or unsuspecting workmen. Birds typically hover above products before loafing so they will not be harmed.

Available in Three Widths (all are 12 in. long)
Because ledges vary in size, we offer three widths: Narrow, Wide and X-tra Wide.

WHERE TO USE  Ledges, parapets, signs, beams, pipes, chimneys, cut-outs, security cameras, lights, etc..
TARGET BIRD  Pigeon and larger
BIRD PRESSURE  Medium (Do not use where birds are nesting)
MATERIAL  Stainless steel and polycarbonate
INSTALLATION  Base is glued or screwed to any surface
INSTALLATION LEVEL  Easy

Multiple rows of Bird-Flite protect a steel beam from pigeons.
A single row of Bird-Flite keeps pigeons off of this ornamental ledge on a retail store.
This attractive structure is protected against pigeons by Bird-Flite spikes.

Bird-Flite
Bird-Flite is sold by the foot. Narrow & Wide case qty. = 100 ft. Xtra-Wide case qty. = 50 ft.

Easy Application
Dura-Spike is an all stainless steel spike that comes in three-foot lengths for quick and easy application. The base can be cut easily with snips or shears. Dura-Spike bends easily allowing it to easily accommodate curves and irregular surfaces conforming easily to the building’s features.

How it Works
Pigeons and larger birds are not able to gain a foothold on the protected surface and are forced to take their mess elsewhere.

How to Install
Use the spacing guides (right) to determine the best model for the application. Clean the surface thoroughly, Secure using Bird Barrier Bond (see page 25) or screw it down.

Warranty
Dura-Spike is warranted for ten years and should perform for many more.

Totally Humane
The blunt tips on the ends of each spike cannot hurt birds or humans.

Space Saving Packaging
Dura-Spike stacks neatly, one row nesting neatly inside of another offering smaller boxes that take less room in the service vehicles.

WHERE TO USE
Ledges, parapets caps, roof peaks, chimneys

TARGET BIRD
Pigeon and larger

BIRD PRESSURE
Medium (Do not use where birds are nesting)

MATERIAL
Stainless Steel - 304 grade wires & base welded together

INSTALLATION
Base is glued or screwed to any surface

INSTALLATION LEVEL

Original Bond 10.2 oz. (ea.) HA-BB03

Installation video at www.birdbarrier.tv
**Gutter-Point™**

WHERE TO USE: Specifically designed for attachment to the inside lip of rain gutters.

TARGET BIRD: Pigeon and larger

BIRD PRESSURE: Light - Medium

MATERIAL: Stainless Steel and Polycarbonate

INSTALLATION: Stainless steel clips slide over lip of rain gutters

INSTALLATION LEVEL: Easy

---

**Easy Application**
Slip the stainless steel clips provided over the upper lip of the gutter and move on to the next section.

**How it Works**
Thin stainless steel spikes protrude upwards from a plastic base, making it difficult for birds to gain a foothold. Gutter-Point’s specially designed clips make it easy to install and the spike configuration protects not only the edge of the gutter, but the inside as well.

**Removable**
Many gutters require periodic cleaning, and Gutter-Point can be easily removed, then clipped back on when the cleaning is done.

**Hard to See**
The thin, but rigid, stainless steel rods are almost invisible from a distance.

**Humane**
Gutter-Point’s rods are not sharpened to prevent injury to humans, animals or birds.

**Installation**
Simply slip the stainless steel clips provided over the upper lip of the gutter and move on to the next section.
Ideal for rooftop perimeters and building ledges, the four-inch stainless steel Bird Coil expands to 25 foot length. Installation hardware sold separately.

**4" Coil (25 ft.)**  
CO-4000

**5" Coil (25 ft.)**  
CO-5000

**Almost Invisible**  
When seen from a distance of twenty feet or more Bird-Coil virtually disappears, and from fifty feet it’s invisible.

**How it Works**  
Based on the simple premise that birds like a solid landing platform, Bird-Coil de-stabilizes the ledge, causing unwanted pigeons and gulls to take their mess elsewhere.

**How to Install**  
Bird-Coil can be attached to any substrate using adhesive and our special coil clips. Install one clip per foot with Bird Barrier Bond or the appropriate screw and clip it in place. It’s fast, easy and very secure.

**Totally Humane**  
Bird-Coil’s smooth curves are completely harmless to both birds and unsuspecting workers needing access to ledges.

**Coil End Posts**  
The base of the bracket is configured to accept two screws or it can also be glued to the substrate. With the bracket screwed (or glued) in place, simply slip Bird Coil into the upper clip, then slip the bottom of Bird Coil under the end of the bracket as shown in the photograph to secure.

**Wood with Screws Kit**  
Screw Bird Coil Clip 12” on center and attach End Brackets. Kit includes 23 stainless steel Bird Coil Clips, two End Brackets and 27 Wood Screws.

See page 22 for Bird Barrier Bond and Super Bond.
WHERE TO USE  Ledges, eaves, angle irons, I-Beams and most “L” shaped ledges where total exclusion is the goal.

TARGET BIRD  All species, including Swallows

BIRD PRESSURE  All pressure levels

MATERIAL  UV-stabilized Polycarbonate

INSTALLATION  Base is glued to any surface

INSTALLATION LEVEL  Easy to Moderate

When Total Exclusion is a Must

There are ledges where heavy pressure (nesting birds) demands an exclusion system, and netting may be visually unacceptable. BirdSlide completely protects the ledge against all bird species; they simply can’t get a grip and “slide” right off the ledge.

Designed to Disappear

When color matched to the structure, BirdSlide usually looks like it’s a part of the building. It comes in gray or beige, but can be primed and painted (by the customer) to match any color.

Easy to Install

For ledges six inches, the flat base simply glues to any clean surface using Bird Barrier bond. For narrow ledges the “fin” can be trimmed down; for wider ledges an extension can be added. BirdSlide can be screwed to wood.

Long-Lasting

Made from UV-stabilized polycarbonate. Two-year warranty against UV breakdown. Paint the product to extend its life.

Customizable

BirdSlide can be ordered in lengths up to ten feet (extra freight charges will apply), and it can be painted to match the structure.

(A) Ledges 3” to 6” Wide

Cut the trim area at the appropriate width.

(B) 6” Ledges

Use BirdSlide exactly as it comes out of the box.

(C) Ledges Wider than 6”

Attach these special extensions for even wider coverage.

(D) Eaves

BirdSlide can be installed under eaves to exclude mud swallows. It can easily be cut to accommodate beams and other architectural features.

If adding a third extension as shown here, please contact a Bird Barrier representative for advice on providing proper support.

Ledges between the beams are an ideal application for BirdSlide.

*Inverted application is not recommended for wide eaves.
More Ways to Buy BirdSlide

We are pleased to offer several new cases for your convenience.

- BirdSlide up to 10-feet long. Custom ordered.
  NOTE: extra freight will be charged for dimensional weight.
- Custom color runs for large projects.
- Call for details

Now made in 5 ft. lengths for faster installation and greater installation diversity.

End Caps

Next Generation. Keep birds and wildlife from getting behind the BirdSlide. Our extruded attachment slides on to the end of the BirdSlide, then the Corner piece slides into that at a 90 degree angle. Glue the cap to the wall and ledge, (sold in a pack of 5 right and 5 left end caps).

Slide-on Extensions

For wider ledges (see photo on opposite page), BirdSlide Extensions can be added to increase the size and coverage. Extensions are 6" wide, and now they just slide on to the top of the BirdSlide. This is a fast and easy process which looks attractive and professional.

Install with Bird Barrier Bond, p. 22

A 10 oz. tube secures 25 ft.
**Birdwire™**

WHERE TO USE
Long, exposed ledges, parapets, signs, beams, pipes

TARGET BIRD
Pigeon

BIRD PRESSURE
Light - Medium

MATERIAL
Stainless Steel

INSTALLATION
Stainless steel, nylon coated wire is attached to stainless steel posts and tensioned using springs

INSTALLATION LEVEL
Involved

---

**Very Discreet**
The Birdwire system is one of the least visible of all ledge products, and is frequently used on high-visibility ledges where aesthetics are important.

**How it Works**
Nylon-coated, spring-tensioned stainless steel wire is attached to stainless steel posts at differing heights and intervals. The posts are secured to masonry using nylon anchor rivets (requires drilling into the surface) or glue-on bases.

**Variety of Options**
The posts are available in various sizes and many different brackets and clamps allow installation on otherwise hard-to-protect surfaces like sprinkler pipes, rain gutters and I-beams. Stainless steel split pins can be used to install the system inside window reveals.

**Totally Humane**
Harmless to birds and humans alike.

**Special Attachments**
These attachments make it possible to install a Birdwire system anywhere.

- **Pipe Clamp**
- **Gutter Clamp**
- **Beam Clamp**

**Spacing Guidelines**
Rows of wire are three inches or less apart, and installed at five foot intervals. Posts should alternate in height to increase the effectiveness of the system.

Springs are installed every ten feet (every other post) to ensure the correct tension.

---

**Installation Videos**
Learn how to install Bird Barrier products right in your office.

[Installation video at www.birdbarrier.tv]
**Birdwire Posts**
Made from polished 316 grade stainless steel. Flattened heads with a coined hole prevent chaffing of the Birdwire. The ends of the posts are chamfered for easy installation into the anchor rivets. For use with 1" Anchor Rivets. When drilling into masonry and using the 1" Anchor Rivet use these posts:

- 4.5 in. Posts (25) BW-P0452
- 4.5 in. Posts (100) BW-P045
- 6 in. Posts (25) BW-P0602
- 6 in. Posts (100) BW-P060

**For use with Glue-on Bases**
When drilling is not an option, use Glue-on Base and these posts:

- 3.5 in. Posts (25) BW-P0352
- 3.5 in. Posts (100) BW-P035
- 5 in. Posts (25) BW-P0502
- 5 in. Posts (100) BW-P050

**1” Anchor Rivet**
Low-profile nylon anchor provides a secure installation for the posts when drilling into masonry. Color is gray. 100/bag

- Anchor Rivet - 1 in. (100) NI-AR10
- 6.5mm Drill Bit TB-S065

**Birdwire Glue-on Base**
Base can be glued or screwed onto properly prepared metal or wood. Set screw secures post. Color is gray. Other colors may be available by special order; call for information. Ten per bag.

- Glue-On Bases (10) BW-B100
- Bond 10.2 oz. (ea.) HA-BB03
- Super Bond Tube (2 part) HA-BS01

*One Bond tube installs 125 bases, see page 22 for more details*

**Birdwire Crimp**
Thread Birdwire through nickel-plated copper crimp to attach it to the bird posts or split pins. 100 crimps per bag.

- Birdwire Crimps (100) BW-C000

---

**Birdwire**
Seven-stranded, stainless steel wire, coated with U.V.-stabilized clear nylon. Diameter is .7mm with a breaking strength of 100 lbs.

- Birdwire (250 ft.) BW-W010
- Birdwire (500 ft.) BW-W020
- Birdwire (1,000 ft.) BW-W030

**Springs**
Made from 316 grade stainless steel with one loop slightly open to facilitate attachment to the bird post or split pin. Available in standard or less conspicuous micro-spring. 100 springs per bag.

- Standard Spring (100) BW-SS00
- Micro Spring (100) BW-SM00

**Beam and Gutter Clamps**
Install Birdwire posts to an I-beam or other horizontal steel surface (up to 3/4" thick). All stainless steel. Install Birdwire posts to the gutter bead, metal roof or other vertical surfaces (up to 3/4"). All stainless steel. Posts are 3.5 in. tall. 10/pack.

- Beam Clamp (10) BW-BC00
- Gutter Clamp (10) BW-GC00

**Ridge Brackets**
Special brackets are available for both triangular and half-round ridge roof tiles. The ridge bracket can be screwed in place, while the half-round bracket has two adjustable locking flanges.

- Bracket - 3 Posts (ea.) BW-RB31
- Bracket - 5 Posts (ea.) BW-RB51
- Bracket Round-2 Posts (ea.) BW-RB30

**Railing Clamps**
Birdwire posts are welded to adjustable, stainless steel clamp for attachment to handrails or pipes. Six sizes are stocked; other configurations and larger clamps available by special order. Ten clamps per pack.

- 1 in. clamp - 1 Post (10) BW-RC11
- 2 in. clamp - 1 Post (10) BW-RC21
- 3 in. clamp - 1 Post (10) BW-RC31
- 4 in. clamp - 1 Post (10) BW-RC41
- 4 in. clamp - 2 Posts (10) BW-RC42
- 6 in. clamp-2 Posts (10) BW-RC62

Pipe Diam.
- 3/4" - 1-1/4"
- 1" - 2-1/2"
- 2" - 3-1/2"
- 3-1/4" - 4-1/4"
- 3-1/4" - 4-1/4"
- 4-3/4" - 6-1/4"

**Birdwire Crimp Tool**
Specially designed indent crimping tool for attaching crimps to the Birdwire. This tool also has wire snips.

- Birdwire Crimping Tool (ea.) TO-BW10
**TowerGuard™**

**WHERE TO USE**
Long, exposed ledges, parapets, signs, beams, pipes, railings

**TARGET BIRD**
Gulls, Cormorants, Vultures, Osprey, Hawks and Owls and other large birds

**BIRD PRESSURE**
Light - Heavy

**MATERIAL**
UV Stabilized Plastic, polyester line, some metal parts

**INSTALLATION**
Secure posts to the structure. Run wire or polyester cord loosely through the holes in the posts.

**INSTALLATION LEVEL**
Easy

---

**How it Works**
Tower Guard deters Gulls, Cormorants, Vultures, Osprey, Hawks and Owls and other large birds. It creates both a visual and physical barrier for railings and flat surfaces. Birds are looking for a low “cost of energy” perch that is easy and safe. As they view the Guard, they see that it takes away the perch and it is too small and unstable to land on.

**Removable**
By pulling a simple pin, the posts can be easily removed from the bases. This allows for maintenance on antennas and railing where access is important.

**Material**
Made from the same plastic that the telecom industry uses for its outdoor boxes. It’s well documented to withstand UV degradation for many years.

**Non-Metal Options**
For sensitive applications (radar and radio sites), the Tower Guard system can be installed without metal parts. Use the polyester cord (not the metal Birdwire), and replace the Post Locking Pin with a short length of polyester cord, knotted as shown on the opposite page.

---

**Safety Tip**
In areas where people may come in contact with the posts, a version with a yellow rounded safety cap is an option.

**Placement**
Flat Surface - Posts should be no more than 2 in. from the outer edge. They should be no more than 5 ft. apart from each other. When running multiple rows, stagger the posts as shown in the diagram.

Railing - Posts should be no more than 5 ft. apart from one another.

---

**Mounting Options**
The V base can fit on a round or square railing. These can be attached with plastic cable ties, metal hose clamps or with nails/screws on a wood structure.

The round/flat base can be placed on beams with magnets, metal parapets with a washer and adhesive, and on wood with nails or screws.
Tower Guard Posts
The post are 14” tall and are ½” in diameter. They are designed to accommodate different heights of cord or wire. We recommend using one of the top and bottom holes to create those levels. Both the cord and wire are easily pulled through the holes. High winds and temperatures do not affect the posts. The post tip adds an extra repellent feature, but if safety is a concern, the Safety Posts, featuring a yellow cap, should be used.

Wire and Cord
The stainless wire offers lower visibility for sensitive areas, whereas the polyester cord is more of a visual irritant to the birds. Both options create the barrier to deter large bird species. Leaving a little slack in the line adds another imbalance for those that try to perch. Use the cord if a non-metallic installation (for communication towers and radar installations) is required.

</tr>
</tbody>
</table>

Post Lock
Tower Guard bases come standard with a metal safety pin to lock the post into the base. For non-metallic installations, substitute the polyester cord, with two knots. This is a fast and easy application. UV stable zip ties can also be used for a non-metallic installation.

<td>TG-B15</td>
</tr>
</tbody>
</table>

Tower Guard Bases
Both bases stand 5 in. tall without the posts. Choose the right base for the surface being protected (see box at bottom of page 38). Generally, the V-base is for tubes, and the round base is for flat surfaces. Mount the bases 5’ apart. Stagger them every 2-1/2 ft. if installing multiple rows. Rows should be not more than 5” in. apart.

</tr>
</tbody>
</table>

Fasteners for Round Base
For steel surfaces, choose the magnetic base with the O-Ring. To glue to a surface, add the Flat Disk for maximum adhesion. For wood, use the Screw/Nail kit.

<table>
<thead>
<tr>

<td>C. Bird Barrier Bond 10.2 oz.</td>
<td>HA-BB03</td>
</tr>
<tr>
<td>D. Round Base Screw/Nail Kit (5 sets)</td>
<td>TG-F15</td>
</tr>
</tbody>
</table>

Fasteners for V-Base
These can be attached with the UV-protected cable ties or the stainless hose clamp. Use a cable tie tool when installing the ties for a strong, consistent install (it tightens and cuts the excess length). The hose clamps should be tight, but not enough to damage the base. Both work in all environments. (Note: cold weather condition zip ties are also available).

Multiple rows of Tower Guard keep large birds off wide ledges like this metal parapet cap. Installation on the edge of this roof repels California Condors.

Also available, galvanized steel solutions for towers.

Talk to an Expert. We will help you succeed: 800-503-5444.
What is Eagle Eye?
The Eagle Eye Bird Control System is a sustainable, scientifically-based, open-area bird deterrent system comprising different visual devices that—while completely harmless—encourages birds to take up residence elsewhere through behavior modification.

The Eagle Eye and Pro-Peller visual devices deter birds from a given airspace by reflecting filtered sunlight at a particular wavelength that they have adapted to associate with danger. After perceiving the light from Eagle Eye, birds will change their flight paths to avoid the protected area. Each unit is coated with a special surface layer that filters light unique to each species. This reflected light does not affect humans or other animals such as livestock, so it is safe to use in nearly any industrial, commercial, residential, or agricultural application.

The Eagle Eye Guarantee
The key to any Eagle Eye installation is proper placement with regard to the building’s orientation, environment, obstacles, and even the movement of the sun across the sky!

Eagle Eye’s experienced in-house team of technicians use satellite photography of the location to design a solution unique to each commercial, industrial, residential or agricultural setting. Matthew Eargle is Eagle Eye’s chief technician and support consultant for North America and is on call to design a system guaranteed to solve almost any bird problem! Contact him at 310-525-3319 or matt@usaeagleeye.com to get started!

When properly specified and installed, Eagle Eye will guarantee a reduction in bird presence of up to 60-80% within three months in most cases. While Eagle Eye visual deterrents do not typically affect nesting birds, Eagle Eye’s auditory devices and Bird Barrier’s physical devices complete the system to offer a robust, long-term solution.

Visit us at USAEagleEye.com for complete information.
3 Colors of Eagle Eye for Different Species

The Eagle Eye is available in 3 different colors to match the ocular morphology of various species.

1. **Silver (EE-S)**: Guaranteed to deter pigeons, but may also work against turkey vultures, crows, and geese.
2. **Gold (EE-G)**: Guaranteed to deter starlings, but may also work against sparrows, grackles, and other similar birds.
3. **Red (EE-R)**: Guaranteed to deter gulls, but may also work against cormorants, pelicans, and other marine species.

Eagle Eye System Components

The Eagle Eye unit is a rotating, reflective pyramid with irregular, angled sides that reflect light in various directions. The flagship device of the Eagle Eye Bird Control System, the Eagle Eye provides the greatest amount of coverage over the largest areas. There are powered and wind-driven options available.

### 110v. Kits

This kit includes a new weatherproof electrical housing, lead wire, straight and bent tube, metal mounting bracket and hardware kit.

- **Eagle Eye 110v Silver Kit** (EE-1PS)
- **Eagle Eye 110v Red Kit** (EE-1PR)
- **Eagle Eye 110v Gold Kit** (EE-1PG)

### Solar Kits

This kit includes a more powerful solar panel, lead wire, straight and bent tube, metal mounting bracket and hardware kit.

- **Eagle Eye Solar Silver Kit** (EE-1SS)
- **Eagle Eye Solar Red Kit** (EE-1SR)
- **Eagle Eye Solar Gold Kit** (EE-1SG)

### Wind-Powered Kits

This kit comes without the motor and has wind wings mounted on each corner (it spins in the slightest breeze), straight and bent tube, metal mounting bracket and hardware kit.

- **Wind-Driven Silver Kit** (EE-1WS)
- **Wind-Driven Red Kit** (EE-1WR)
- **Wind-Driven Gold Kit** (EE-1WG)

### Pro-Peller

The Pro-Peller is a durable, cost-effective unit used to complement the Eagle Eye by extending the effective range and flashing pattern. The unit rotates by means of its double-bearing system and the wings have been designed to rotate in the slightest of breezes.

- **Pro-peller Silver** (EE-PPS)
- **Pro-peller Red** (EE-PPR)

### Physical Deterrents

The Eagle Eye Bird Control System is designed to deter a majority of birds from a given airspace while in flight, but for the heaviest-pressure scenarios, Eagle Eye recommends physical supplementation with devices like StealthNet and Bird-Shock Flex-Track!

### Mounting Pole

The pole mounts into the flat bracket to provide better range of coverage for the Eagle Eye. The bracket should then be mounted to a substantial surface such as a paver brick or the building itself to prevent falling over. If using a paver brick, the solar panel can mount there as well to create a self-contained, portable unit (see photo).

- **Mounting Pole** (EE-XP6)

### Angled Mounting Bracket

For mounting to peaks or corners. Not included in kits.

- **Angle Bracket** (E-AB)

### Eagle Eye Shine

The Eagle Eye needs to be cleaned periodically to maintain its reflectivity. Use these special formulas designed to maximize the unit’s reflective properties while protecting the surface from oxidation and degradation. Cleaning formulas are specific to the color of the Eagle Eye unit.

- **Eagle Eye Shine** (EE-SHN)
OvoControl® P

WHERE TO USE Large sites like refineries, power plants, paper mills, airports, malls, food processing plants, parks, campuses
TARGET BIRD Pigeons
BIRD PRESSURE All pressure levels
MATERIALS General use pesticide, doesn’t hurt birds, just stops eggs from hatching. Like birth control for pigeons.
INSTALLATION Install automatic feeder on flat rooftops
INSTALLATION LEVEL Easy

Product Information
OvoControl P is a ready-to-use bait that controls the reproduction of treated birds, causing the population to decline. This effective and humane technology is especially useful for managing pigeon flocks in larger areas without having to resort to poisons and their associated risks.

Registered by EPA (Reg. #80224-1)
Approved in all states except New Hampshire, OvoControl P is ideal for large areas where some pigeons can be tolerated but where a substantially reduced population is desired. OvoControl P is non-hazardous and supported by the Humane Society of the United States, ASPCA, Audubon and the Peregrine Fund.

Recommended Use
Baiting can begin at any time — flat rooftops are ideal. OvoControl P has a wide margin of safety and efficacy. No special license is required to purchase or apply the product.

Efficacy
Pigeons breed rapidly – just five mating pairs can produce up to 400 pigeons in only two years. Fortunately, the life-span of urban pigeons is short, limited to just 2-3 years. When applied according to label directions, OvoControl P interferes with egg hatchability. Since no new birds are hatching, the population of birds declines naturally and continuously. Field studies show a reduction of approximately 50% annually. Recently collected data at a monitored site in San Diego reflected an 88% decline over 28 months.

Dosage
OvoControl P is supplied in 30 lb. bags. Apply once daily with an automatic feeder at a rate of 1 lb. per 80 pigeons.

Non-targets
OvoControl P has a contraceptive effect only in birds and has no secondary effects in birds of prey. OvoControl P is considered a pesticide and care should be taken to avoid administration to non-target birds and other animals.

OvoControl® P
Bat Kibbles - 30lbs. OV-PG05
Tripod Feeder OV-PG12
Feeder Mat OV-PG25

Estimate your OvoControl jobs at www.birdbarrier.com/ovocontrol

OvoControl S – for English house sparrows is under development and seeking test sites. Call us if you are impacted and would like to test this product.
OvoControl application is made easy with an automatic feeder and optional rechargeable battery and solar panel.

Acting as birth control, OvoControl eliminates the ability for pigeons to reproduce and allows the population to decline.

Feeder
Tripod Feeder includes battery and solar panel.

OvoControl ready-to-use kibbles are sized just right for pigeons.

At a South Carolina chemical plant, a combination of OvoControl & live trapping reduced the pigeon burden to near zero over just 6 months.

This condo complex managed down its small population of pigeons with the installation of one feeder on the rooftop.

Expansive footprint of this power utility in Arizona is ideal to take advantage of OvoControl’s population abatement properties.

New Feeder Mat
Heavy Duty 1/2” rubber mat protects sensitive roofs and secures the feeder to a flat surface. Features pre-punched bolt holes that match up to the feeder’s feet for a bolted connection. Secure with bricks or other appropriate weights.

A Houston medical center used OvoControl as well as physical deterrents to rid the facility of a chronic pigeon problem.

At a South Carolina chemical plant, a combination of OvoControl & live trapping reduced the pigeon burden to near zero over just 6 months.
Finally, Mist Nets that are EASY to Set Up and Take Down!

Reach ceilings up to 36 ft. without ladders or lifts.

Using a mist net to capture birds in a store is already a challenging matter. Your equipment shouldn’t make it harder!

Bird Barrier’s new Mist Net Kits minimize labor time and headaches through a series of innovations:

1. An angled 140-pound magnet locks to steel beams, shelves and pipes.
2. Rubber coated hooks are used to hang poles from pipes and conduit.
3. A removable, 60-inch top section enables users to simply roll up mist nets when done using them.
4. Telescoping 18-foot and 24-foot bottom-section poles deliver smooth cam-lock section control. And aluminum is far stiffer than fiberglass.
5. A locking coupler provides a strong link between the top section and telescopic poles.
6. Flexible fiberglass chase pole and painter’s tape flag are an ideal way to chase birds toward the net.
7. Laser pointer reinforces the chase pole.

The mist net rolls up easily around the removable top section of the pole:

To ensure the netting will not tangle, roll it up on the pole with a sheet of plastic as shown above (otherwise it will not unroll). Make sure the edges of the netting are within the borders of the plastic sheet. Plastic sheet is included in the kit.

Removable Top Pole
No more bundling and un-bundling mist nets. Simply roll them up on the separate top section and slide into a dedicated carrying case.

Usage Video:
www.birdbarrier.com/mistnet

New Professional-Grade Interior Laser, see page 56.
Mist Net Kits - Fast to Deploy, Easy to Use

Bird Barrier has invested significant time in the field perfecting these Mist Net Kits. Emphasis has been placed on strength and rigidity, deployment speed, and effectiveness. The most significant development is undoubtedly the removable top pole which allows the operator to simply unroll the net; no more unbundling a tangled net and attaching it to the pole every time.

Mist Net in Place

When properly deployed, a Mist Net develops hanging pockets to catch the birds. When a bird is caught the net must be taken down immediately and the bird removed safely.

Magnetic Pole Top

Featuring 140 lbs. pull force, this is a fast, convenient way to secure mist net poles to beams, pipes and other metal surfaces.
Sparrows in a facility are messy and difficult to catch.

The Trap Door makes it easy. Sparrows hear the friendly chirp, see the food, step on the perch, and fall inside unharmed. The trap contains the bird waste, bait etc. It is a hygienic way to contain the birds until they can be removed from the building.

Preventative Sparrow Control
Place traps where birds are anticipated, and catch them when they first enter. The audio can be programmed to work with any schedule.

Sparrows “splat” 200 times per day. Watch the time-lapse video www.birdbarrier.com/splat

www.birdbarrier.com/videos
1 - See it catch sparrows
2 - Instructional video, a must watch

Sparrow Call Dramatically Increases Efficacy
The Trap Door is four times more effective with the optional audio attractor. The call operates on an intermittent basis so birds don’t get used to it. There are ten different programs to choose from. Use on the Trap Door, or to draw sparrows into a mist net or cage trap.

Convert to a Multi-Catch
The Trap Door can be secured to the top of a Bird Barrier sparrow trap. The Trap Door captures the first bird and drops it into the cage trap. Once inside that bird attracts more birds.

Sparrow Trap Door TT-SP15
Sparrow Trap Door w/Audio TT-SP20
Sparrow Trap Audio Module TT-SP25
110 v. USB Plug and 10 ft. Cable TT-SP27
Cage Trap for Sparrow Trap Door TT-SP29

Trap Door Dimensions Closed: 12.5"H x 6.5"W x 11.5"D
Trap Door Dimensions Opened: 18.25"H x 6.5"W x 9.25"D

Positioning
The trap should be placed high up in the facility near the most bird activity. Put on a shelf or secure to a post. Set the trap to the open position and bait and check regularly. Multiple traps will be necessary in large facilities. Detailed instructions are included.

High-Reach Pole Mounting
Now Trap Doors can be positioned on high shelves and hung from pipes (hanger included) from the safety of the ground. All Trap Doors now ship with a pole attachment riveted to the back, which accepts Bird Barrier’s aluminum extension poles (see page 61).
Collapsible Pigeon Trap
- 35" x 16" x 8" High
- Easy to assemble
- Collapses to one inch for storage
- Shade screen
- Four one way entry doors
- Heavy 14 gauge galvanized welded wire
- Unique design, water/feeder kit can be added
- Centered top access door for easy removal of birds
- Capacity: 10 + birds

Pigeon Trap w/Shade, Water & Feeder
- 35" x 16" x 8" High
- Three one way entry doors with door guard
- Centered top access door for easy removal of birds
- Shade screen
- Water container/feed pan designed for easy service
- Shade/water/feeder features attracts additional birds
- Heavy 14 gauge galvanized welded wire
- Capacity: 10 + birds

Lg. Pigeon Trap w/Shade, Water & Feeder
- 46" x 24" x 10" High
- Six one way entry doors with door guard
- Two easy access top doors for removal of birds
- Shade screen
- Two water containers and one feed pan for easy service
- Shade/ water/feeder features attracts additional birds
- Heavy 14 gauge galvanized welded wire
- Capacity: 20 - 30 + birds

Repeating Pigeon Trap with Shade
This trap is designed with a unique hinged divider - for easier bird removal and features a Full Wire Floor. Has 4 one way entry doors with door guards - this means it has doors on all sides! Plus you have 2 centered top access doors for easy removable of birds. Can hold 35+ birds and no assembly required - simply remove from the box and place where needed.

Dimensions: 46" x 24" x 10"
Shipping weight: 13 lbs

Pigeon Trap
- Easy Assembly
- Completely collapses to 1" for storage
- Four one-way entry doors; one on each side
- Unique design: built-in feature for optional water/feeder kit
- Capacity: 18+ birds

Pigeon Trap for Slanted Surface
A complete trap that can be set up in minutes saving your company valuable time and money. Patent pending. As with all traps, this trap should be secured to slanted roofs with a safety line.
- 36" x 24" x 10" High
- Six one way entry doors with door guard
- Two easy top access doors for easy removal of birds
- Heavy galvanized flat pan
- Four entry door ledges with food trays built in
- Set of four adjustable legs, two - 12", two - 24" - used for leveling out trap, no tools needed
- Water container/ feed pan designed for easy service
- Shade/ water/feeder features attracts additional birds
- Capacity: 20 + birds

Lg. Pigeon Trap w/Shade
- 46" x 24" x 10" High
- Six one way entry doors with door guard
- Two easy access top doors for removal of birds
- Shade screen
- Two water containers and one feed pan for easy service
- Shade/ water/feeder features attracts additional birds
- Heavy 14 gauge galvanized welded wire
- Capacity: 20 - 30 + birds

Showed with water & feeder kit installed

Talk to an Expert. We will help you succeed: 800-503-5444.
The Big Mama Pigeon Trap with Perches
Catch up to 25 pigeons at a time. This trap has many innovative features including:
• Four easy entry doors (two at each end)
• Two wooden perches create more room for others below
• Large access doors to service food and water
• Can be extended to double size (50 birds) with the Transporter
Carrier or transfer birds into the Transporter for carrying

Dimensions: 36" x 24" x 26" High
Shipping weight: 19 lbs.

Sparrow Trap
Two-chamber, bi-level repeating trap is ideal for sparrows. The trap accommodates twelve sparrows at a time. Unlike ground level traps, the birds enter the trap and immediately move to the elevated 2nd level, which eliminates their feeling of entrapment and the need to emit a distress call.

Sparrow Trap (ea.) TT-SP10
Dimensions: 16" x 12" x 8"
Shipping weight: 4 lbs.

Repeating Sparrow Trap
This trap has many innovative features including:
• Divided trap with two top access doors
• Proven bi-level design
• Easy access to service feed and water
• Six entry funnel doors, three for each compartment

Repeating Sparrow Trap (ea.) TT-SP50
Dimensions: 36" x 24" x 10" High
Shipping weight: 14 lbs.

The Monster Pigeon Trap with Perches
The biggest pigeon trap available, catch up to 50 birds at a time
• Six easy entry doors (two at ends, one on each side)
• Four wooden perches create more room for others below
• Large access doors to service food and water

Large Pigeon Trap (ea.) TT-SW25
Dimensions: 80" x 24" x 26" High
Shipping weight: 40 lbs.

Pigeon Transporter Carriers
These transporters are the perfect way to take birds from a site without having to bag or carry large traps through buildings.
• Secure to the Big Mama Pigeon Trap with provided latches
• Top and side easy access doors
• Slide-out pan for easy cleaning
• Can accommodate separate food and water modules (see this page)

Carrier for 12-20 Birds TT-SW40
Carrier for 30-35 Birds TT-SW45

Water & Feeder Kits
Add water and food to many of our traps with these modular kits. Easy to install and clean.

48 oz. Water & Feeder Kit TT-SW50
For smaller pigeon traps, 12" x 6" x 8" High

One Gal. Water & Feeder Kit TT-SW55
For large pigeon traps, 16" x 10" x 10" High

Multi-Catch Cage Trap for the Sparrow Trap Door
Turn your Sparrow Trap Door into a repeating trap. The first sparrow is caught and falls inside the cage trap. Once inside it sings happily and attracts other birds.
• Trap Door secures to the top with spring clips
• Can be hung from the ceiling with provided cable bridle
• Two “draw bridge” style patios provide safe entrance for birds and are hinged up for transport
• Secure inner chamber can be stocked with food and water
• Sanitary metal slide-out pan keeps all food and droppings inside the trap
• Trap Door trap can be easily removed by unlatching the spring clips from the slots and sliding the trap forward while closing the top of the cage to eliminate the possibility of any birds escaping.
• Includes food and water containers for humane treatment of birds

Cage Trap for Sparrow Trap Door (ea.) TT-SP29

For Starling Traps, visit birdbarrier.com
Rigid Traps with One Trap Door
- Made from high tensile heavy gauge wire mesh.
- Galvanized wire for corrosion resistance resulting in 3x longer life.
- Trap frame and doors contain 25% more reinforcing rods for added strength.
- More O-Ring supports securing trigger mechanism and preventing animal damage.
- “Sure-Fire” trip mechanism with brass roller system assures nearly 100% capture rate.

Trap for Chipmunks, Gophers, Rats & Similar Sizes
Dimensions: 18 x 5 x 5 in.
Construction: 1/2 x 1 - 16 gauge
Weight: 2 lbs.
TT-WT05

Easy Release Trap for Chipmunks, Gophers, Rats & Similar Sizes
Dimensions: 18 x 5 x 5 in.
Construction: 1/2 x 1 - 16 gauge
Weight: 2 lbs.
TT-WT30

Trap for Squirrels, Muskrats & Similar Sizes
Dimensions: 19 x 6 x 6 in.
Construction: 1 x 1 - 14 gauge
Weight: 3 lbs.
TT-WT10

Easy Release Trap for Squirrels, Muskrats & Similar Sizes
Dimensions: 19 x 6 x 6 in.
Construction: 1 x 1 - 14 gauge
Weight: 3 lbs.
TT-WT35

Trap for Skunks, Opossums & Similar Sizes
Dimensions: 24 x 7 x 7 in.
Construction: 1 x 1 - 14 gauge
Weight: 3 lbs.
TT-WT15

Easy Release Trap for Skunks, Opossums & Similar Sizes
Dimensions: 24 x 7 x 7 in.
Construction: 1 x 1 - 14 gauge
Weight: 3 lbs.

Dimensions: 32 x 10 x 12 in.
Construction: 1 x 2 - 12 gauge
Weight: 12 lbs.
TT-WT50

Rigid Traps with One Trap Door and Easy Release Door
- Superior quality: Same great design, materials, and specifications as the Rigid Trap with One Trap Door.
- Easy animal release: The easy release door provides for the safest and easiest way to release trapped animals.
- Easy animal transfer: Easy release door allows captured animals to be safely and easily transferred to holding or transfer cages. We offer a line of transfer cages that match up perfectly with these traps. This allows you to keep your traps in the field by transferring animals from your traps into transfer cages.
- Easy trap baiting: Baiting is much easier when done from the back of the trap with the easy release door removed. You no longer have to reach through the front of the trap and risk setting it off.
- Simple to operate: Unsnap the latch which holds the easy release door in place, and remove it by lifting up on the attached handle.

Easy Release Trap for Chipmunks, Gophers, Rats & Similar Sizes
Dimensions: 18 x 5 x 5 in.
Construction: 1/2 x 1 - 16 gauge
Weight: 2 lbs.

Solar Panel Protection

This New Kit makes Solar Panel Exclusion Fast, Easy and Attractive

Solar panels are being installed on commercial and residential roofs across America at an ever increasing rate. These arrays provide perfect harborage for birds and other critters, and homeowners are desperate for a solution.

Installation video at www.birdbarrier.tv

The Problem - Pigeon droppings accumulate on roofs under solar arrays.

A fast and tidy installation. The attractive black mesh is locked in place by the Solar Panel Clips.

The mesh is secured on all sides, permanently excluding birds and other wildlife.

This innovative system is designed specifically to keep all creatures from getting under solar arrays, protecting the roof, wiring and equipment from their damage. This non-penetrating system is fast and easy to install, and can be removed for service.

The wire mesh is supplied in rolls. The preferred technique is to cut it into five-foot lengths and straighten, before getting onto the roof. Then, using a 2 x 4, bend up the bottom one-inch to about 30 degrees. This kick-out helps to lock the mesh firmly in place.

Features:
• Patent-pending plastic clips are UV-stable, won’t scratch panels
• Clips recommended every 18 inches,
• The lips bind the mesh to the panels without drilling holes or damaging the system
• Nearly invisible from the ground
• Tin snips and other basic tools required for installation

Solar Panel Kits
We provide clip-only kits, and complete kits with the wire mesh in rolls.

| 50 Solar Panel Clips | SP-EX10 |
| 100 Solar Panel Clips | SP-EX15 |
| 25 ft. of 8 in. mesh and 20 Solar Panel Clips | SP-EX30 |
| 50 ft. of 8 in. mesh and 40 Solar Panel Clips | SP-EX35 |

Bird-Gard

A programmable electronic repeller that uses a variety of species specific distress signals and predator calls to send a “danger” alert to other birds in the area. All units have on-off and volume control, a “time off” phase between sounds and a day-night 24 hour switch. Ideal for spot dispersal of flocking birds in small areas. Plugs into 110 volt power outlet. There are two models:
- **Pro #1** repels pigeons, starlings, sparrows, seagulls and woodpeckers.
- **Pro #2** repels blackbirds, grackles, crows, geese and hawks.

**Bird-Gard Pro #1** SD-BG40
**Bird-Gard Pro #2** SD-BG42
**Bird-Gard Extra Speaker** SD-BGS40

Zon Gun

Propane Cannon for Airports, Fields and Large Open Areas. A lightweight portable propane-fired cannon emits automatic thunderclaps that deters birds and other nuisance wildlife. The intervals between detonations can be adjusted from 2-30 minutes. The Zon Gun operates on LP gas and uses a ‘piezo’ lighter for ignition, which is good for 100,000 sparks. Each 10kg bottle of propane produces 12-15,000 detonations. Model A is standard ground mounted unit and model B is standard unit on tripod shown with propane tank. Standard Model: Fully automatic, ground mounted, simple, practical, effective, rotates 360°.

- **Standard Zon Gun (ea.)** SD-ZN10
- **Timer for Zon Gun (ea.)** SD-ZN25
- **Tripod for Zon Gun (ea.)** SD-ZN15

Spray Away Elite

Chase or harass birds and other pests with a quick blast of water. The new Elite is battery powered and holds its own water. Protect ponds, rooftops, pool decks and other challenging settings.
- **Hose Free** - Flexibility to place it anywhere
- **Safe, Humane, Effective** - Scares animals and birds away with random bursts of water and sound; conditions them to avoid the area
- **Eco-Friendly** - Solar powered, no running water
- **Covers 1,000 square feet**

How it Works: The Spray Away Elite Motion Detector Sprinkler Animal Repellent is a water-based repellent that works by detecting an animal’s heat and movement with infrared sensors. Once detected, the system releases a sudden burst of water to scare the animal away. An adjustable sensitivity detector and random spray pattern prevent animals from growing accustomed to the sprinkler. Instead of a hose, it utilizes a water basin that holds 3.5 gallons of water and lasts for approximately 35 activations. The basin can be buried for discrete nuisance animal protection.

- **Spray Away Elite** SD-SA20

**Sound Deterrents**

Extreme Ultrasonic System by Eagle Eye

The Extreme projects 130dB of ultrasound from a single tweeter mounted in the face of the weather-resistant device. The single tweeter can project ultrasound out to an unobstructed radius of 50 feet in a 90-degree arc from the center of the device, covering approximately 2000 square feet in a fan shape (see diagram). Like the Nightmare, it produces sounds in no predictable pattern so the birds do not become accustomed to the noise and will drive away roosting or nesting pigeons when used properly. The Extreme operates at frequencies above that of average human hearing so it is ideal to deploy in public areas where pigeons are nesting.

**Zon Gun**

Portable, instant animal deterrent. The Zon Gun is perfect for airports, fields, and large areas. It is held by a tripod or placed on the ground. The Zon Gun is safe, humane, and effective with a 360° rotating head. It emits automatic thunderclaps that deter birds and other nuisance wildlife. The intervals between detonations can be adjusted from 2-30 minutes.

**Spray Away Elite**

Water-based repellent designed to deter birds and other pests. It is battery-powered and contains its own water. It is easy to operate and effective in a variety of settings.

**Bird-Gard**

Electronic repeller that uses a variety of species-specific distress signals and predator calls. It is programmable and has a “time off” phase between sounds.

**Zon Gun**

Propane cannon that emits automatic thunderclaps to deter birds and other pests. It is portable and can be used in large open areas.

**Spray Away Elite**

Sprinkler animal repellent that uses infrared sensors to detect animals and automatically sprays water to deter them. It is portable and can be used in various settings.

Talk to an Expert. We will help you succeed: 800-503-5444.
Fly Away High-Powered Laser
For Outdoor Use Only

Introducing a new, professional grade bird-repellent laser that costs way less than the other heavy-weights on the market. The Fly Away laser can be used to get birds out of trees and crops. It can also be used to chase birds from rooftops.

Features and Benefits:
- 30 mWatt output power green laser beam (532nm wavelength)
- Safe for both humans and birds
- Large beam creates a large spot on the surface (ground, trees, walls etc.) to assure targeted birds can’t ignore it
- Effective range up to 1 mile
- Rugged all aluminum construction
- All external joints sealed to allow use outdoors even in light rain
- “Flashlight” style for ease of handling and light weight
- Powered by 2 “D” cell flashlight batteries – Lithium and rechargeable batteries OK
- Lockable carrying case and full usage instructions
- 1 year parts and labor warranty

Fly Away Laser SD-AV15

Fly Away Interior Laser 2™
Designed for Indoor Use

It’s an established fact that lasers are effective at scaring birds.

Now we have developed a laser that will allow you to chase birds inside buildings towards open doors, mist nets or traps without having to worry about operators accidently pointing the lasers at highly reflective surfaces and possibly harming themselves or others.

The Fly Away 2™ is bright enough to scare birds from as far sway as 250 meters while remaining eye safe to operators and those who may accidentally have the laser pointed at them briefly.

- Class 3A, 532nm wavelength green laser
- Birds do not learn to ignore it
- Safe for both humans and birds
- Large beam to assure targeted birds can’t overlook or ignore it
- Effective range up to 250 meters (indoors)
- Rugged all aluminum construction
- All external joints sealed to assure safe, reliable operation
- Flashlight style for ease of handling and light weight
- Powered by 2 flashlight batteries – Lithium and rechargeable batteries OK
- Lockable carrying case
- 1 year parts and labor warranty
- 5 to 7 year expected life

Fly Away Interior Laser SD-AV25
Flash-Tape
Mylar tape reflects sunlight, and creates a humming sound when tape is twisted in the breeze, signalling danger to birds in the area. Available in 1/2” x 300’ rolls. One roll per package.

Reflective Flash-Tape  SD-FT30
**Avian Control®**
A new, patent-pending, EPA-registered liquid bird repellent that will chase your birds away. The product is a replacement for Migrate and Fog Force. Avian Control® uses cutting edge technology to efficiently repel undesirable birds without harming the birds, humans or other animals (including household pets).

Avian Control is EPA-registered for use on numerous crops to prevent damage from foraging birds. The repellent is effective against many types of nuisance birds including geese, pigeons, starlings and grackles. All of the ingredients in Avian Control® are food grade.

Avian Control® can be either fogged or sprayed and is compatible with both types of equipment for ease of application. It is designed for effective use – less often, in less quantity and to better effect. In outdoor applications, Avian Control® has a life expectancy of up to two weeks, but the results last much longer because birds “learn” to avoid areas treated with Avian Control®. While non-lethal to birds, it acts as an irritant discouraging birds from amassing. The dual application methods (fogging or spraying) are ideal for airplane hangars, grassy fields, golf courses or large properties.

**Avian Migrate™**
A non-lethal liquid bird repellent that discourages geese and birds from congregating on golf courses, parks, athletic fields and around public buildings. Simply spray as directed – the effect is immediate and long lasting.

Avian Migrate contains a special colorant, visible only to birds, that lets them know that the area has been treated. This “teaches” unwanted geese and birds to stay away from treated areas in the future.

Avian Migrate™ irritates bird’s pain centers, creating an unpleasant sensation. Birds learn to avoid areas that have been treated and seek other locations. It does not harm grass, shrubs and other vegetation and is not easily rinsed away by rain or sprinklers.

Avian Migrate™ is non-toxic. Its active ingredient is found in nature and is also used extensively in food designed for human consumption. All Avian Migrate™ ingredients are “Generally Regarded As Safe” (GRAS) by the US Food and Drug Administration (FDA) and are “Earth friendly.”

**Avian Fog Force TR**
Avian Fog Force TR Bird Repellent is an EPA-registered bird repellent that is effective against all types of nuisance birds and is suitable for use around humans, pets and livestock. It’s a non-lethal automated time-release aerosol bird repellent that discourages birds from congregating in dairy barns, stables, stadiums, marinas, garages and storage buildings, pools and patios and outdoor dining facilities.

Avian Fog Force TR is non-toxic. Its active ingredient is found in nature and is also used extensively in food designed for human consumption. All Avian Fog Force TR ingredients are “Generally Regarded As Safe” (GRAS) by the US Food and Drug Administration (FDA) and are “Earth friendly.”

It irritates bird’s pain centers, creating an unpleasant sensation. Birds learn to avoid areas that have been treated and seek other locations.

**Avian Fog Force TR Dispenser**
Avian Fog Force™ TR is dosed from light sensing user programmable time-release dispenser cabinets containing disposable aerosol cans. Each dispenser cabinet releases an invisible, intermittent aerosol bird repellent mist on a user-selected programmable time-release basis. Spray mist dispenser cabinets can be placed strategically in areas where nuisance birds are a problem and without any additional labor.

Dispenser cabinets are powered by two “D” batteries that last up to six months.
It’s important to properly clean a site before installing bird control products. Follow these steps to insure that cleanup is done properly.

1. Moisten, Loosen Debris
Dried bird droppings will become airborne when disturbed (cleaned). It is important that they are wetted down to eliminate this risk. Wetting with a bactericide will kill the bacteria at the same time. With heavy accumulation it is necessary to wet down repeatedly.

2. Scoop, Collect
It’s unlikely that large volumes of waste can simply be washed away; they need to be scooped up and removed in bags, and disposed of properly. Contact your local waste facility about the disposal of bird droppings.

3. Wash
Once the majority of the waste is removed, the building surface can be washed with water, detergent and scrub brushes; or pressure washed. Use the Dissolve-It again, it’s a live enzyme that softens even the most stubborn waste.

4. Sanitize
With all the waste now removed, and the building looking clean, it is recommended to finish the job properly by applying a bactericide that will sanitize the surfaces and leave a clean smell.

5. Clean Around the Site
The building is clean, but the sidewalk’s a mess. Finish the job properly.

**Dissolve-It™**
Dissolve-It breaks down bird droppings and eliminates odors. It allows for easy removal of stubborn, caked-on droppings. Simply mix Dissolve-It in a 1:1 ratio with water, saturate the target area and let the solution work for at least fifteen minutes. Solution can be applied with a hand sprayer. The residue will easily spray away with hose or power sprayer. Non-toxic, non-flammable and biodegradable, plus it is USDA accepted, environmentally safe. It can be poured over piles of bird droppings, as well as into drains, trash cans, sewers and grease traps. Use at 1:1 spray mixture with water. Mix 1:1 – 1 Gallon makes 2 gallons

| Dissolve-It (1 gal.) | CL-3000 |
| Dissolve-It (5 gal.) | CL-3005 |

**Dirty Bird**
Use Dirty Bird on any washable surface exposed to bird droppings, like roofs, gutters, ledges, awnings, chairs etc. It has been adapted to quickly break down and provide rapid organic waste removal including bird droppings. Dirty Bird can be used at 100%, but should be diluted. Mix 1:4 – 1 Gallon makes 5 gallons

| Dirty Bird (1 qt.) | CL-7000 |
| Dirty Bird (5 gal.) | CL-7005 |

**Repellent Gel Remover/Oil-Flo**
This product effectively dissolves the polybutene commonly found in bird gels. After dissolved you are left with an easy cleanup. It is water soluble and will not damage most surfaces (with the exception of tar-based roofing materials). Instructions for use included.

| Repellent Gel Remover (1 gal.) | CL-1000 |
| Repellent Gel Remover (1 gal.) | CL-1010 |

**MBDC-10 (Microbial Bird Dropping Cleaner)**
is designed to replace ordinary cleaners with a safe, concentrated formulation that is safe for any surface that will not be harmed by a water based cleaner. DILUTION: MBDC-10 may be diluted with water 5-10 parts water to 1 part MBDC-10 depending on amount of soiling. APPLICATION: Use any power washer or hand sprayer. Spray on surface to be cleaned and allow soak time. Fully wet and loosen material. If droppings are not immediately removed when rinsed, a second application and soak cycle may be necessary. Note: If area is sanitized following removal microbial activity may be impaired. Mix 1:5 – 1 Gallon makes 6 gallons

| MBDC (1 gal.) | CL-5000 |

**Cleaning Solutions**
Batcone 2®
For best results with Batcone 2®, bend flanges slowly back and forth to prevent breakage.
- At dawn or dusk, which is the best time to conduct “batwatch”, observe points of entry/exit for bats in structure.
- Incoming/outgoing bat activity will assist in determining number of cones needed for installation (see DVD for more detailed information). For large bat colonies, use multiple cones for best results.
- Install cones at entry points, always at a downward angle…it is CRITICAL to seal all other entry/exit points before installing cones strategically to prevent bats from moving to other sections of structure.
- After bats leave structure to feed and you are certain they are all outside the structure, remove remaining cones and seal all holes.

A WORD OF CAUTION: Please note that removing bats during their birthing cycles can result in the offspring becoming trapped inside the structure. Please contact your state wildlife agency or state health department for information regarding bat birthing cycles in your region.

Batcone 2®
The innovative design of the Batcone 2® is ideal when a square shape is better suited to the entry port of a bat colony. It is designed with a built-in solid flange with mounting holes which allows easy and fast installation. It can also be used with the flexible vinyl flange, making it effective for virtually any surface application.

Pro-cone® Square
Designed for multiple use and multiple wildlife species: Bats, red squirrels, flying squirrels, sparrows, starlings, rats and mice. Made from heavy duty plastic, built-in solid flange with mounting holes. Offset square flange for installation in difficult areas. Optional use with vinyl or wire flange. Can be installed in corners of soffits. Square base allows you to “wedge” cone into place.

**Squirrel, Rodent & Bird Exclusion**

### Squirrel Cone - One Way Doors

Use Squirrel Pro-Cone(s) in any location at any angle: Attic vents, above gutters, corners of dormers or anywhere squirrels may enter a structure. Get them out fast!

*For added protection use Rat-Out Gel around squirrel repair sites (see pg. 59).*

**How to use:**
- Determine squirrel activity by locating entry and exit point(s) on structure.
- Install cone(s) over hole(s). Please note - Squirrel cone(s) can be installed at any angle.
- It is imperative to “squirrel proof” all inactive areas of structure before installing cone(s) to prevent squirrels from relocating to other areas such as: Attic vents, louvers, corners of dormers and soffit areas etc. We suggest using metal flashing and/or ¼ inch wire mesh (hardware cloth) (page 14) to help prevent possible re-infestation.
- We recommend leaving squirrel cone(s) in place for a minimum of three to five days to insure that squirrels are out.
- When you are certain that squirrels are gone, remove squirrel cone(s) and seal hole(s) with metal flashing and trim trees around structure to help prevent further re-infestation.

**CAUTION**
- DO NOT remove squirrels during their birthing cycles. This will result in offspring becoming trapped inside.
- Failure to follow these directions, will force the female squirrel to chew her way back in to reach her young.
- Please consult your State Wildlife Agency for information regarding squirrel birthing cycles in your area.

### Pur Black Foam

This foam was developed especially for outdoor use. It’s a must for nuisance control professionals doing exclusion work on structures. It stops pests from entering buildings. It’s black color blends into the surrounding environment and it never looks dirty. 32 oz. can: 1/2” bead = 1,200 linear feet)

| Pur Black, 32 oz. | TF-PUR1 |

### Pur-Fill Gun Cleaner

Maintain your gun with a screw on Pur-Fill Gun Cleaner.

| Pur-Fill, 20 oz. | TF-GCP1 |

### Pageris Foam Gun

This state-of-the-art stainless steel and poly foam gun gives you professional control of foam flow and placement. It’s a real time-saver for exclusion work and to fill cracks and holes found during your property site inspections.

| Pageris Foam Gun, 12” | TF-PFG1 |
| Pageris Long Foam Gun 24” | TF-PLG1 |

### Foam Gun Kit

Includes green plastic molded carrying case, 3 cans of foam, 1 full size cleaner, 1 Pur Clean, 6 needle adapters and 1 flexible hose.

| Foam Gun Kit | TF-FGK1 |

### Copper Mesh Stuffing

This fine copper mesh is ideal for stuffing into small access areas to exclude birds or bats. For a more secure hold squirt some Bird Barrier Bond into the hole, making sure to connect the mesh to the surrounding surface.

| Mesh Stuffing (per roll) | N8-CM |

**Squirrel Cones**

- Use an any angle
- No door to jam
- No moving parts to break
- Standard 14 Gauge model
- Heavy Duty 12 Gauge model

| Grey Squirrel Heavy Duty Short (7 x 3.5 in.) | N8-SC05 |

| Red & Flying Squirrel Standard Long (12 x 2 in.) | N8-SC40 |
Green Bed Bug Control with 12-Month Residual

“At Phoenix Pest Control, we have experienced a 100% success rate in all of our Cimi-Shield treatments ever since we starting using the product nearly 2 years ago. How do we know? Zero call-backs!”

Jerry Martinie
Phoenix Pest Control, Phoenix, AZ

Cimi-Shield
Cimi-Shield is offered in two formulations each with 12-month residual:
- Knock-Out for active infestations
- Protect to prevent infestations

One finished gallon protects 1,200 to 1,500 sq. ft. of fabric surface.

- Kills bed bugs on contact
- Non-toxic; won’t harm the environment
- Derived from soybean oil
- Removes bed bugs’ waxy outer layer
- Has zero odor
- Will not stain
- Easily applies with a pump sprayer
- Sold as a concentrate, mix with distilled water
- Meets FIFRA 25(b) Guidelines to be “Generally Regarded As Safe”
- Delivers 12 months of residual protection on textile surfaces
**Effective against Rats, mice, squirrels, possums, raccoons & more.**

It’s an instant OFF switch for rodent activity.
- **Dual Action** - Garlic Oil and White Pepper repel rodents and most wildlife invaders
- **Not harmful**, doesn’t burn
- **Stop rodents NOW**; give your clients immediate relief (and reduce call backs)
- **FIFRA 25(b) EPA Exempt**; satisfy your clients’ green requirements
- **Enhance exclusion programs** - Buy time while waiting for repairs
- **Improve trapping programs** - Move the rodents to control zones away from your clients customers.
- **Clear gel** - no mess, cleans up easily with soap and water
- **Will not melt**, evaporate or freeze

Three 1 oz. Tubes  PC-R030

---

**Border Control**

Border Control is a thin, paper-backed glue board that comes in a 60-foot roll. It is easy to carry, simple to deploy, and can fence off crawling insects or mice quickly and easily. Border Control can be cut to fit almost any situation.

**Border Control**
- Corral work zones. Keep small rodents or insects from crawling away and infesting other areas.
- **Monitor any area** and quickly see where the trouble spots are.
- Protect sensitive product. Encircle pallets or shelves, and then see what tries to enter, or exit.
- Slide Border Control under pallets, or inside the fork-slots; tape to a thin sheet of plywood or paneling.

**Magnetic Trap Bases & Stations**

**WHERE TO USE**
Any metal surface like dumpsters, pipes, fences, beams, HVAC Units, metal doors, food service equipment and more.

**TARGET SPECIES**
Rodents

**MATERIAL**
Plastic

**INSTALLATION**
Simply attach the magnet to a metal surface or to fender washers screwed into a non-metal surface.

**INSTALLATION LEVEL**
Easy

Attach Bait Stations to any metal surface like dumpsters, where rodents are often found.

Position Snap Traps in the path that rodents take, even on narrow rusty pipes.

Bait Stations can be placed horizontally and vertically to accommodate your client’s needs.

Position Bait Stations and Snap Traps where you never dreamed possible. Horizontal, vertical, even upside down, these innovative tools stay put and get the job done.

**Magnetic Snap Trap Base**
Two powerful magnets generate almost 24 lbs. of pull force power. Holds: Kness Big Snap, Trapper T-Rex, Catchmaster Model 621P EZ, Motomco Tomcat, Victor Power Kill Rat Trap.

Snap Trap Base RC-SB01

**Magnetic Raptor Bait Stations**
Mount the station off the ground, keep bait dry. Mount in any position, rats enter, eat the bait or get caught in the snap trap (even upside down). Mount to metal doors, dumpsters, fencing, HVAC equipment, pipes, fender washers you install. Strong magnets produce 35 lbs. of holding power. Large openings attract curious rats. Both models are available without magnets.

- Raptor SL has 4 molded-in plastic bait rods
- Raptor Edge has 2 molded-in plastic bait rods and it holds your favorite snap trap

Raptor SL Snap Trap Holder, w/Magnets RC-RP20
Raptor Edge Snap Trap Holder, w/Magnets RC-RP25

13.5 x 8.75 x 2.75 in.
13.5 x 8.75 x 4.5 in.
Longer, Stronger, Stiffer, Lighter & More Durable

- Made of lightweight aluminum
- Low-profile couplers slide easily through the hands
- A quarter turn locks or unlocks each section
- Twist lock cams allow the pole to be locked at any length
- Rolled tube edges
- Anodized finish
- Universal sized screw adapter

Extended Length | Closed Length | # of Sections | Part #
--- | --- | --- | ---
8 ft. | 31 in. | 2 | N8-TP01
18 ft. | 60 in. | 4 | N8-TP05
24 ft. | 83 in. | 4 | N8-TP10

Fits in ANY vehicle

The Internal Cam-Lock System is fast and easy to lock and unlock, just twist the sections in opposite directions for a firm lock down.

Product Warranties

Bird Barrier America, Inc. uses the finest materials available to ensure long lasting protection. Our products are the best in the industry and deliver many years of bird-free solutions. No guarantees are stated as to the effectiveness of any Bird Barrier product. It is incumbent on the installer to make sure the correct products are installed. If the wrong product is put in the wrong place it will not deter birds. Bird Barrier’s technical staff is happy to consult with our customers to insure the best products are selected.

Bird Barrier’s warranty covers the following products for the following terms and conditions.

- Black StealthNet®: Ten years materials, workmanship and ultraviolet degradation limited warranty*  
- Stone (beige) and White StealthNet®: Three years materials, workmanship and ultraviolet degradation limited warranty*  
- StealthNet® Hardware: Stainless steel, five years against debilitating corrosion. Galvanized, two years against debilitating corrosion.  
- Bird-Flite® Spikes and Gutter Point Spikes: Five years against debilitating corrosion and ultraviolet degradation.  
- Dura-Spike®: Ten years against debilitating corrosion  
- BirdSlide™: Two years against debilitating ultraviolet degradation  
- Bird Coil® and related hardware: Five years against debilitating corrosion  
- Birdwire® and related hardware: Five years against debilitating corrosion and ultraviolet degradation  
- Bird-Shock® and Tree-Shock: Five years against debilitating corrosion and ultraviolet degradation  
- Bird-Shock® Charger Units: Two years functionality if installed according to owner’s manual. Batteries one year.  
- Daddi Long Legs®: Five years against debilitating corrosion and ultraviolet degradation  
- Eagle Eye™: One year warranty against mechanical failure and ultraviolet degradation.  
- OvoControl®: No warranty  
- Optical Gel: No warranty  
- Adhesives: Products that utilize adhesive must be installed with Bird Barrier Bond: five year warranty, or E6100: one year warranty. Any substitute adhesive voids all warranties.

* StealthNet® Limited Warranty: StealthNet is warranted by Bird Barrier America, Inc., on a repair or replacement basis only, at its option, for the period of years as outlined above, after original purchase from Bird Barrier America, Inc., by an authorized distributor, or installation date by installer against any defects in materials and workmanship. All warranty replacements shall be free of cost during the warranty period. This warranty does not include damage caused by improper installation, natural disasters, abuse, misuse, negligence, modification, accident or improper handling. Upon presentation of a representative sample of the affected product along with proof of purchase Bird Barrier America, Inc. will either repair, replace or provide a comparable new product. In some cases the repairs shall be made to the netting while it is still installed; therefore the netting must not be removed from the treated area without written instructions from Bird Barrier America, Inc.

Replacement of any of the items listed above is at the discretion of Bird Barrier America, Inc.

THESE WARRANTIES CONSTITUTE ALL OF THE WARRANTIES WITH RESPECT TO THE SALE OF PRODUCTS INDICATED. BIRD BARRIER AMERICA, INC., EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, WHETHER EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND BIRD BARRIER AMERICA, INC., NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME FOR IT ANY LIABILITY IN CONNECTION WITH THE SALE OF THESE PRODUCTS. IN NO EVENT WILL BIRD BARRIER AMERICA, INC. BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGE WHETHER OR NOT FORESEEABLE. BIRD BARRIER’S WARRANTIES COVER PRODUCT REPLACEMENT ONLY. PRODUCT INSTALLATION/RE-INSTALLATION COSTS ARE NOT COVERED IN THE PRODUCT WARRANTIES.

Installation of products in a different manner than prescribed in our specifications, written or video instructions automatically voids all warranties. All claims must be submitted in writing and must contain a copy of the original invoice from Bird Barrier America, Inc. or an authorized distributor. Please direct all problems or claims in writing to:

How to Order, Terms and Conditions

We offer a variety of convenient methods for you to place your order with us. All are fast and easy for you, and will be attended to by our staff in the same professional manner.

By Phone:
Simply call your order in to one of our knowlegable technical consultants. They will make sure we have everything you need and will get the order shipped in most cases the same day.

By E-mail:
Simply address an order to bbasales@birdbarrier.com and one of our specialists will get your order moving. Please be sure to include your telephone number so we can contact you with any questions.

Online:
Use the “shopping cart” at www.birdbarrier.com and your order is in our hands immediately. It’s easy to use and can be done at any time of the day. Our site offers secure payment processing, and will also be reviewed by one of our technical specialists.

Through a Distributor:
If you buy from one of our distributors your order will ship as outlined in your relationship with that company. If we drop-ship on their behalf we will do our best to ship the same day we receive the order.

Methods of Payment:

Credit Card:
This is the easiest and fastest way to purchase your goods. We accept American Express, Visa and MasterCard. Please make sure you are prepared to give us the mailing address of your credit card statement as we will need that for verification.

C.O.D.:
Another fast way to place an order is using Cash on Delivery. Our sales associates will call you back with the exact amount of the check to have ready. New customers on large orders will be asked to have a Cashiers Check prepared for pickup by the shipper.

Pre-Payment by Mail:
Send us a check with your order form and we will fill your order. Orders may be held until the check clears the bank (approximately ten days).

Installer Credit:
Bird Barrier may be able to extend credit to regular customers based on the results of a Credit Application and subsequent evaluation. Please ask your technical consultant for a credit application.

Terms of Sale:
The Bird Barrier catalog is printed annually. We do our best to guarantee all prices, but they are subject to change at any time.

Shipping Methods:
We work with a wide variety of freight carriers so we can get you what you need when you need it. When you place your order, let us know when you need it and we will select the best delivery method.

Freight Charges:
The customer is responsible for freight charges. If you ask us, we will confirm a freight charge before the order ships. This way you can make an educated decision about the form of shipment.

Return Policy:
Returns after 30 days are subject to a 15% Restocking Fee. Customers need to contact Bird Barrier to obtain Return Authorization prior to sending the product back. Custom-cut StealthNet is NOT returnable.

All orders received by noon (Pacific time) are shipped the same day unless they require substantial net cutting.

Save Time: Call your order in directly toll free:

Note - We do our best to insure the accuracy of everything in this catalog, but occasionally errors do occur. We are not bound to sell items at prices that are in error. Thank you.
The ultraviolet light spectrum appears to birds as fire.

Optical Gel keeps all birds off all structures without harming them. It does so by altering their behavior, not by acting as a physical barrier. Once applied, birds will completely desert a habitat, even one they have been using for years.

Optical Gel is applied in low-profile application dishes, only 8mm high. It has successfully repelled birds from protected "heavy pressure" sites, and is ideal for sites where mechanical deterrents can’t be used.

*Works on All Birds*
